West Bank Palestinians Seek Independence Call

By Joel Brinkley New York Times Service

JERUSALEM - The underground leadership of the Palestinian uprising has decided that a declaration of independence should be issued for the West Bank and Gaza Strip, but the leadership will let the Palestine Liberation Organization carry out the initiative, according to Palestinians close to the leader-

Even then, the declaration "will

be only a political initiative," said

one of these Palestinians - welleducated and leading members of the Palestinian community - who are close to the leadership. "No one has any expectations of anything on the administrative lev-

cl here in the West Bank and Gaza," he said Sunday. "How can you have a real inde-pendent state under occupation?" he added. "Are you dreaming? It's

an impossible dream." For the last week, Israel has been preoccupied with discussion of the idea that Palestinians are about to declare independence, now that King Hussein of Jordan has relinquished any claim to the West Bank.

PLO figures, too, have been quoted as saying they are consider-

ing the idea. They have said they may set up a government in exile. If they do, it is likely that they will get diplomatic recognition from the Arab nations and other countries that do not recognize Israel. There are reports that some in

the PLO are considering other ideas too, such as setting up some form of provisional government inside the occupied territories. But details are sketchy. Israelis dismiss the proposal for

a declaration of independence. Prime Minister Yitzhak Shamir calls it "a crazy idea since there is no chance whatsoever that it will be realized." "I have the sense that the idea is

an abortive concept," he said. "All the camps in Israel — the large camps, at the least -- view it as a great danger to our very existence. Paradoxically, it was the Israelis

who inadvertently started public discussion of the idea two weeks ago, when they arrested and imprisoned a Palestinian militant, Faisal al-Husseini. Israel said he was working to support the upris-ing on behalf of the PLO.

The authorities searched his office and found a draft Palestinian declaration of independence. The See PLO, Page 2

Compiled by Our Staff From Dispatches EREZ, Gaza Strip - Palestinians defied a round-the-clock curfew in the Gaza Strip on Monday, throwing stones and burning scores of tires in the streets, the Israeli Army said.

A curfew in the area has confined 650,000 Palestinians to their homes. It was imposed Sunday night following violent protests in which at least 21 residents of the Gaza Strip were wounded by Israeli gunfire.

As a result of the curfew, about 50,000 Arab workers were unable to go to their jobs in Israel.

Security sources said disturbances began after Islamic fundamentalists in Gaza called for clashes with troops to protest the deaths of two Gazans killed in an arson attack near Tel Aviv last week. Palestinians blame Jews for the attack, although the police have made no

The demonstrations were also prompted by the killing of a Palestinian in the Mughazi refugee camp Thursday night and the death Sunday of a Shati refugee camp resident, whom Palestinians said was beaten by troops.

The army said the resident died of an illness.

It was the third time since the Palestinian rebellion began Dec. 8 that soldiers have imposed an indefinite curfew and sealed off the Gaza Strip to journalists and other

Journalists were halted by soldiers at the Erez checkpoint at the entrance to the Gaza Strip.

Witnesses said Monday that people filled the main roads of Gaza City with burning tires and that soldiers carried out mass identity checks in the refugee camps.

At an entrance to Gaza, an Israeli officer showed reporters cardboard impregnated with pieces of nails, which he said was put in the main streets by youths to puncture the tires of Israeli cars.

identification cards, searching bags, and marching detainees off to police buses.

At Yonsei University, where more than 2,500 students gathered, riot police waited for hours for students to march out the gate. To the clanging of traditional Korean cymbals and the banging of drums, students waving brightly-colored banners and flags danced outside

them. The police seized students. who had roped themselves together, beat them, kicked them and dragged them along the street to

waiting buses. They forced students to kneel down on the street, where they con-tinued to kick them. Some of the students' backs were stained with blood. The beatings continued until one riot police commander, using a swagger stick on the backs of

his own men, ordered them to stop. Students tried twice again to march out of the gate, and each time the police drove them back with tear gas, charging onto the campus in a breach of the usual rules that govern these almost ritualized confrontations. After the third failure to march off the campus, students retreated and returned an hour later, this time armed with rocks.

The rock-throwing continued for two hours and then abruptly stopped. Riot police and students met in the middle of the wide avenue in front of the school, turned around and began scooping up the rocks that littered the road.

The police set up several checkpoints along the road to Panmunjom, stopping cars, searching trunks and bags, and checking identifications. Nonetheless, the police reported they arrested four students who managed to get as far north as Munsan, about an hour and a half's walk along the route to Panmuniom.

ters will be used to observe the cease-fire line, UN sources have said.

2d Blaze Hits Empire State Building

NEW YORK (AP) - A fire broke out on the 51st floor of the Empire State Building on Monday, forcing dozens of office workers to evacuate the 102-story building. Officials said the blaze, the second there in three

days, was suspicious, but declined to elaborate.

The fire began in a pile of carpets discarded in a stairwell and produced

heavy smoke, but caused only minor damage. It was extinguished about half hour after it began. From 50 to 100 people on five floors of the

tower's midsection were evacuated. One woman was hospitalized with

tions network for the 24-nation UN team.

The Foreign Ministry spokesman, Wolfgang Meyer, said in a statement that the decision followed a mutual recognition accord reached in June between the East European trading group, Comecon, and the EC. The June agreement brought a formal end to 30 years of mistrust between the

two groups.

"The government of the GDR and the Commission of the European Community have agreed to establish diplomatic relations with immediate effect," he said. He did not say when diplomatic staff would be ex-

Pretoria to Electrify Border Stretch

JOHANNESBURG (AP) — The South African Army plans to creet a 14-mile (24-kilometer) electrified fence along a section of the Botswans border following renewed complaints about infiltration by guerrillas. Military headquarters, in a statement made public Monday, said the fence would be built near the Pontdrif border station in far northern

Transvaal Province. Pontdrif is near where the borders of South Africa, Botswana and Zimbabwe intersect. There have been several recent encounters in the area between South African security forces and suspected guerrillas of the outlawed African National Congress. Two years ago, South Africa crected an electrified

fence along a section of its border with Mozambique, primarily to cut down on the number of Mozambicans entering South Africa illegally.

Mexican Opposition to Vote Is Rising

MEXICO CITY (NYT) — Stepping up their campaign to impugn the results of last month's presidential elections, opposition parties have announced a series of new efforts intended to prevent Carlos Salinas de Gortari, the official winner of the vote, from taking office.

At a protest rally Sunday, Manuel Clouthier, the candidate of the righttember and humiliate South Korea of-center National Action Party, read a letter he said he had sent to in the eves of the world.

Scientists say that weather is too variable and computer models still too limited to blame a specific climatic event on the greenhouse effect. But the torrid conditions this summer are said to fit into an inexorable trend of global warming that will add an average of 7 degrees as soon as the year 2030.

There are signs everywhere this summer of possible consequences of the greenhouse effect. Michael Oppenheimer of the Environmental Defense Fund and other envi-ronmentalists cite an array of conditions: The death of forests, as mountaintop red spruce from Maine to North Carolina and California pines wither from drought and from air pollution magnified by heat; the proliferation of poisonous algae blooms from the Chesapeake Bay to the North Sea; the raging forest fires in Western states, racing through tinder-dry groves; the melting of glaciers in Alaska and in the Andes; the 35-year drying trend of the sub-Sahara; steadily rising sea levels and the erosion of 70 percent of the world's beaches.

Shooting by Columnist Kindles Gun Control Debate in U.S.

By B. Drummond Ayres Jr.

New York Times Service
WASHINGTON — Nothing fans the

WASHINGTON — Nothing fans the ever-smoldering gun control argument into flame faster than an incident involving a gun and a well-known figure.

After the assassinations of President John F. Kennedy, his brother Robert and the Reverend Martin Luther King Jr. Congress was moved in 1968 to enact controls on gun imports and interstate gun sales.

Debate over further controls followed the 1975 assassination attempt against President Gerald R. Ford and the 1981 attempt against President Ronald Rea-

Now the debate is raging again, perhaps as hotly as at any point in a decade or so. This time it is being fueled by an incident involving Carl T. Rowan, a syndicated columnist and television com-The debate goes well beyond whether Mr. Rowan, a longtime advocate of strong gun-control measures, should be

pilloried in the court of public opinion

and tried in a court of law for firing an

unregistered .22-caliber pistol and slightly wounding a young swimming pool trespasser in his backyard. A larger issue is an effort on Capitol

Hill to enact the most far-reaching hand-gun legislation since the 1968 law and an effort in Maryland to retain a newly enacted handgun law that is one of the toughest in the country. Once again there is increasing public

debate about the constitutional right to bear arms and the need somehow to end the many murders and holdups commit-

ted with easily obtainable guns.
As for Mr. Rowan, as a result of the late-night pool incident he faces misdemeanor charges for possessing an unregistered gun and ammunition. The gun was not registered as required by city law, he told investigators, because

it had been brought into the city by his son, Carl Jr., while the younger Rowan was working as an agent for the Federal Bureau of Investigation. Mr. Rowan said his son had given him the gun after he had received several threats on his life. The young swimming pool trespasser, he continued, lunged at

Opponents of gun controls have seized upon the pool incident, using it to ridi-cule not only Mr. Rowan but also advocates of firearms controls in general.

In the process, the 62-year-old journalist has been called "Rambo Rowan" and the "Jacuzzi Vigilante" by some of his critics, while others have lampooned him with posters and placards. He has re-ceived a stream of hate calls and letters.

"I am the pawn in a brutal game between those who favor and those who oppose handgun control." Mr. Rowan said at his arraignment after pleading not guilty to a charge that could send him to prison for up to two years. Outside the courthouse, pro-gun advocates jeered.

The gun control legislation now before Congress, which would mandate a seven-day waiting period on handgun pur-chases so that the police could check the background of purchasers, had already been introduced when Mr. Rowan wounded the young trespasser. But it was attracting little attention beyond Capitol Hill, despite the fact that its passage

him, leading him to fire the pistol. would be a major step forward in gun

The pool incident changed all that. "It's hard to ascertain what effect the shooting will have on any votes, but it certainly has helped bring the gun issue to the forefront once again," said Richard Gardiner, the assistant general counsel for the National Rifle Association, or NRA, the nation's most powerful gun

The House is expected to vote on the seven-day delay legislation shortly after Labor Day and the Senate soon there-

Mr. Gardiner's assessment also appears to hold true for the Maryland gun control situation.

There, pro-gun forces are citing the Rowan incident as they try to overturn a recently passed law meant to stop the sale of cheaply made handguns that anti-gun forces refer to as "Saturday night spe-cials." The Maryland law will be on the November ballot in the form of a referen-

Both contests are expected to be close. The rifle association has already spent

million members, urging them to pres-sure members of Congress not to pass the

Gun groups allied with the association are also spending heavily in Maryland in the effort to overturn the new handgun

"I don't know how the Rowan thing will cut, but I do know gun control is a hot subject now," said Barbara Lautman, an official of Handgun Control Inc., per-

an official of Handgum Control Inc., perbaps the leading anti-gun group.
"We don't have anything like the money to spend that the NRA has, but we
think we're going to win in Maryland,
and we think we have a good chance of
winning on Capitol Hill. These are the
most important gun control fights we
have seen in a long time."

What does Carl Rowan think of the
gun issue, given the pool incident?

gun issue, given the pool incident?
"I want to make it clear," he said the other day as he emerged from his arraignment, that I still favor a strict national law to control the availability of handguns to those who are not law enforce-

DUTY-FREE DEPARTURE? — A Soviet INF Treaty inspector carrying a new radio cassette recorder shaking hands with his U.S. counterpart while another shifted through his luggage prior to leaving Frankfurt on Monday. U.S. Relaxes AIDS Drug Rule

By Philip M. Boffey
New York Times Service
WASHINGTON — The U.S. Food and Drug Administration, bowing to pressure from AIDS patients and members of Congress, has relaxed its normal rules and agreed to make an experimental drug more widely available to patients suffering from a severe form of pneumonia.

The drug, trimetrexate, has been used experimentally to treat pneumocystis carinii pneumonia, the leading cause of death in AIDS patients. Originally developed as a cancer drug, trimetrexate can have toxic side effects. It has has been used by a narrow group of AIDS patients, those who have reactions to the two approved therapies for

The drug has assumed enormous symbolic importance in the struge between AIDS patients and effectiveness have not been proven.

The new policy on trimetrexate, amounts to a significant retreat by the Food and Drug Administra-tion. Under the policy the agency will allow the drug to be used by patients who, while suffering no ill effects from the two other drugs used to treat the pneumonia, also did not respond to those drugs.

Up to now, the agency has insist-ed that experimental drugs show at

ate, the agency has agreed to make while allowing the drug's wider use, the drug available to a group of patients, even though officials said studies have not yet shown effectiveness for that type of patient. The policy on trimetrexate was hailed by David Barr, a staff lawyer

for the Lambda Legal Defense and Education Fund, a homosexual rights advocacy group based in Manhattan, as opening "an entirely new approach to providing experimental treatments to people with AIDS and other life-threatening illnesses." Mr. Barr played a key role in pressing the agency to change its stand on the drug. The two drug treatments already approved and in standard use

egainst the pneumonia are injectable pentamidine and trimethoprim-sulfamethoxazole, marketed as Bactrim. An inhaled form of gie between AIDS panents and as Bactrim. An innaied form of U.S. regulators over access to expentamidine is used in experiperimental drugs whose safety and ments. The agency announced in Febru-

ary that trimetrexate would be made available only to patients who experienced severe or lifethreatening reactions to the stan-dard therapies. Trimetrexate is potentially toxic to bone marrow cells and the gastrointestinal tract, although the toxicity can be reduced by concurrent administration of another drug. The action by the agency was based on a study that indicated trimetrexate could help.

least some indication of potential. The agreement that has now effectiveness before they can be been reached will make trimetrexgiven to patients under the agency's ate more widely available through a program to allow drugs to be used inechanism outside of the program

before they pass all the tests required for marketing approval.

A SINGLE MINDED VISION:
MARKETING AND
MEDIA ACROSS ONE MARKET

A MAJOR CONFERENCE SPONSORED BY THE INTERNATIONAL HERALD TRIBUNE AND LEO BURNETT AMSTERDAM, OCTOBER 4, 1988

The development of a single market in Europe will surely bring a major reassessment of European marketing strategies and advertising approaches. The International Herald Tribune and Leo Burnett are pleased to invite senior executives from the marketing approaches.

from the marketing and communications industries to attend an important international conference on the implications of 1992 for the communications industries. Leading political figures, instrumental in the deregulation of the market will address the meeting, and key executives from various sectors of industry will discuss their approach to 1992 and assess the potential impact on marketing and advertising strategies. Those who wish to register should complete and return the form below.

Chairmen: Axel Krause, Corporate Editor/International Herald Tribune; Albert Winninghoff, Chairman, Noordervliet & Winninghoff/ Leo Burnett, Amsterdam

Bush's Coming-Out Party

election, but the election of 1980. That is the year against which their accomplishments will be measured, and it is the twoterm presidency of Ronald Reagan that they must now hope to justify as the basis for four more years of Republican rule to come. You may be sure that there will be a lot of extravagant praise of those eight years, along with vivid denunciations of the Democratic candidates who hope to beat George Bush and Nominee Doe in the fall. But the interesting thing about the Republican legacy after eight Reagan years is not that it succeeded as smashingly as its partisans will pretend or even that it did much better by the country than the Democrats will allow. The interesting thing, when you look back to 1980, is

mestic, have been inverted. In 1980, Ronald Reagan and his party could assume a world and a Soviet leadership that comported at least generally, with his ideological construct: us versus them, And he could carry on about the big-spending Democrats. Now he coexists with a Soviet opposite number who says things about the Soviet system as unflattering as Mr. Reagan was saying then, and he comes before the American people as the Mike

that the two main issues, foreign and do-

Tyson of deficit-making — the champion.

What are the Republicans to make of all this? What is anyone to make of it? Well, the Republican platform-builders, except for a burst of praise for the administration for scaring the Russians into better behavior and condemnation of the Democratic Other for spending more than the president desired,

did not address the new circumstances. George Bush, despite the ragging Michael Dukakis and some Democrats are giving him for it, was probably right in saying the Cold

For Republicans meeting in New Orleans this week, the base mark is not the last election, but the election of 1980. That is the subject has been challenged by events events at least in some degree brought about by the Reagan policies — and one test of both the party and its candidate will be how imaginatively and plausibly they deal with this new circumstance.

The other big test - and Mr. Bush does not seem to be doing nearly so well in dealing with it — is how honestly they deal with the other inversion: the Reagan debt. The vice president has been adamantly opposed to a tax increase and yet talks of programs that will cost money. His proposal of a "flexible spending freeze" does not parse. He is very vulnerable on this, and the Republican arguments, after all those years of balance-the-budget piety, are pathetic. Compared with the inflation-ridden, skyhigh interest years of the Carter administra-tion (you will hear a good deal about them) and given the employment figures of today, the Republicans can, of course, make some large claims. But the good news has been created at a very high and dangerous cost, and the next president, whether he is Republican or Democratic, is going to have to face the consequences. Mr. Bush and his party, so far, have averted their gaze.

To some extent the vice presidential choice may reflect Mr. Bush's attitude on both these gut concerns. In any event, it will be the most dramatic and revealing news of the week. Mr. Bush's decision on a running mate will tell us whether he has decided to run a campaign as novel as the times, one that reflects the new conditions the Reagan administration has helped to bring about as distinct from taking refuge in old platitudes and now outdated pledges. This will be Mr. Bush's coming-out party.

- THE WASHINGTON POST.

The Hope for Cleaner Air

Eighteen years after Congress passed the Clean Air Act, 100 million Americans still that recycle fumes from the engine. What is breathe unhealthy, ozone-laden air, and acid rain continues to kill lakes and burn forests throughout the United States and Canada. Air pollution has been reduced, but not by enough. The White House, Congress and polluters resist the hard choices necessary for further protection of public health and the environment.

Some 70 cities will fail to bring their ozone levels down to federal safety levels by the deadline of Aug. 31. Some will miss by a mile. Air in the New York region, breathed by 17 million people, sometimes contains 50 percent more ozone than permitted. The law provides for sanctions, but they are so draconian that in practice Congress will not let them be applied.

Ozone is created when hydrocarbons and nitrogen dioxide are heated by sunlight. Unlike the ozone in the stratosphere, which protects against the sun's rays, the ozone in urban smog damages human lungs and destroys plant tissues. The major source of hydrocarbons is gasoline. Though emission control devices have reduced hydrocarbons from automobile engines by 95 percent, cars still contribute 60 percent of the hydrocarbons in urban air.

Securing further reductions in hydrocarbons and ozone is hard but essential. This year is shaping up as the worst in a decade for ozone pollution. New studies warn that the health threat from ozone is more serious than supposed and that the safety standard needs further tightening.

It plans to tell the petroleum industry to formulate gasoline that gives off less fumes

that recycle fumes from the engine. What is needed is a new law, to ensure that automakers produce cars that stay cleaner over greater mileage, that towns tackle even small sources of pollutants, such as paint shops and dry cleaners, and that cities like New York reduce the number of vehicles on city streets and switch fleets of cars and buses

over to clean-burning fuels like methanol. The administration is even more indifferent to acid rain. For eight years its policy has been to do nothing but study acid rain and ignore the completed studies when they call for immediate action.

In Congress, Representative Henry Wax-man of California and Senator George Mitchell of Maine have led strenuous efforts to combat smog and acid rain. But their attempts to revise the Clean Air Act are resisted by industrial and regional interests.

Operators of coal-burning power plants in the Ohio Valley would rather export their pollutants through tall smokestacks than install expensive scrubbers. Miners in West Virginia fear their high-sulfur coal will lose markets to low-sulfur coal from the West. Detroit's automobile manufacturers resist any tightening of emission controls.

In the void of presidential leadership, the hope for cleaner air has been throttled in the Congress, chiefly by Senator Robert Byrd of West Virginia and Representative John Dingell of Michigan. Their opposition is dismaying. Smog is burning the lungs of millions of Americans and acid rain is steadily eating away at the viability of natural systems. Yet the Environmental Protection Agen-cy will not go beyond minor technical fixes. Cleaning up pollution is expensive, but the nature are already proving intolerable.

- THE NEW YORK TIMES.

Other Comment

Meanwhile, the Children Die

In the end, none of the sides at last month's Cambodia peace talks listened to the others' proposals. The Vietnamese demanded the dismantling of the Khmer Rouge. The Khmer Rouge said that the Vietnamese must withdraw all their troops without conditions. The Vietnamese and the Khmer Rouge rejected the idea of a United Nations peacekeeping force. They talked past each other and nothing tangible was accomplished. But they did agree to keep open the

possibility of future talks. Also, the Soviets and the Chinese have said that they would discuss a Cambodian peace settlement later this month. That gives the Cambodia question a higher prominence than the rival Communist powers have ever given it, though the prospect of potential Moscow-Beijing harmony makes Washington somewhat uneasy.

So the "great" powers continue to dance and maneuver, while in Cambodia poverty, hunger and political repression prevail. More than 200 of every 1,000 children born in the country die before they reach the age of 5. What will it take to finally get the big guys to care enough about the Cambodians to give them back their homeland?

- Sydney H. Schanberg in Newsday.

The Task Ahead for Burma

It will not be an easy matter for Burma to break away from its disorder. First of all, following the overthrow of the new government, the people are demanding a return to democratic government and an end to the one-party political system. Secondly, until now the military, party and government [have ruled as one], and it will be extremely difficult to find a political ideology to replace "Burmese-style socialism," and a leader to take charge. Japan should generously cooperate in

the reconstruction of Burma's economy through debt aid and other measures. — The Mainichi Shimbun (Tokyo).

Iranians Are Not to Blame

The U.S. Congress is misreading the po-litical tea leaves by balking at compensa-tion payments to families of victims in the Iranian airliner mistakenly shot down by a U.S. warship in the Gulf.

Leaders of both parties claim Americans hold a deep-seated animosity toward Iran for mistreating the hostages it held for 444 days after taking the U.S. Embassy.

Even if members of Congress cannot distingnish between the Iranian government and its citizens, the majority of Americans can. They know that the Iranian citizens aboard that flight were not to blame for their government's unconscionable behav-

ior toward American hostages. President Reagan has shown leadership and compassion in urging compensation. He is right. Americans as a people, for their own sake if no other reason, must do what is right by these families - and not worry about how the Iranian government will behave as a consequence.

OPINION

On Foreign Policy, Bush Is Out on a Far-Right Limb

N EW YORK — In attacking Governor Michael Dukakis for being "far outside" the mainstream of American foreign policy, Vice President George Bush has raised a campaign issue that may boomerang. For it is Mr. Bush who recently has not merely taken himself out of the main-stream but climbed way over onto the right bank.

According to Mr. Bush, Mr. Dukakis has broken with the bipartisan national security policies followed by such Democratic presidents as John F. Kennedy and Harry S. Truman. In fact, Mr. Dukakis not only has called for strengthened conventional forces but for necessary steps of nuclear modernization. He has said flatly: "As president. I will not hesitate to use force to defend our territory, our citizens and our vital interests; to meet our treaty commitments; and to

respond to, or to deter, terrorist attacks."
In these declarations, Mr. Dukakis is certainly within the mainstream of Presidents Kennedy and Truman. And so he is when he adds significantly: "But there is a fundamental difference between using force in self-defense, and using force to impose our will on others."

Thus, Mr. Dukakis opposed military aid to the contras but supported the attack on terrorist bases in Libya and aid to the Afghan resistance. He favored involving other nations from the outset in

escorting nonbelligerent shipping in the Gulf.
Mr. Bush also charges that Mr. Dukakis wants to
use multilateral diplomacy and international organizations. Here it is Mr. Bush who has left the mainstream and put himself at odds with his former self. "A president can't subordinate his decision-making to a multilateral body," he said. "He can't sacrifice

one ounce of our sovereignty to any organization." In making this extraordinary statement, the vice president has repudiate the wise actions of every postwar president. Perhaps he is unaware that even President Reagan, America's most unilateralist

By Richard N. Gardner

postwar president, has found it expedient to negotiate a trade agreement with Canada with binding arbitration of economic disputes and that even while terminating U.S. acceptance of the World Court's general compulsory jurisdiction he has reaffirmed U.S. willingness to have the court resolve disputes over 60 bilateral and multilateral

agreements to which America is a party.

To protect U.S. interests in an increasingly interdependent world, Americans will be "subordinating" their "decision-making" to interna-tional bodies even more as they confront chal-

It is Bush, not Dukakis, who has left the mainstream of U.S. policy.

lenges such as nuclear proliferation and nuclear safety, the AIDS epidemic, international drug The vice president's main target is the United Nations. This is, he said, "a place torn by tensions: an unreal place where the Maldive Islands has the same votes as the United States."

The problem is that Mr. Bush fails to distinguish between the General Assembly, whose often fatuous resolutions have no binding force, and the serious peacemaking and peacekeeping work of the secretary-general, and the Security Council, where the United States has the veto.

As the U.S. experience in Lebanon demonstrates, this can be a dangerous misunderstanding. Because of its hostility to the United Nations, the Reagan administration failed to seize the opportunity to send UN forces from other countries to Beirut in 1982. Instead, it sent marines on a Mis-

sion Impossible into the midst of a chaotic communal conflict, and it paid the price with the loss of 241 young men and a humiliating withdrawal.

Everyone knows the UN's deficiencies, but its men in blue helmets are right now helping reduce the risks of conflict by their presence in the Golan Heights, southern Lebanon and Cyprus. If Mr. Bush would prefer to have American boys taking casualties in those places, he should explain why.

This "integal place from by tensions" is after years This "unreal place torn by tensions" is, after years of neglect, beginning to function as all U.S. presidents since World War II hoped it would. It brokered the Soviet withdrawal from Aghanistan and a

cease-fire in the Iran-Iraq war. In coming weeks, it has a good chance to end the war in Western Sahara and to make progress toward a settlement in Cy-prus. In the next year, there may even be UN peacekeepers in Cambodia, Angola and Namibia. It is this prudent, selective use of the United

Nations and international organizations — supplementing but not replacing the use of American power and diplomacy — that Mr. Dukakis has called for. By taking a stand against such practical multilateralism, Mr. Bush has aligned himself with the forces of mindless unilateralism.

There was once a popular U.S. chief delegate to the United Nations who had a broader vision. "I am convinced," he said, "that the world needs — and we in the United States need, for our own security and well-being — an effective organization for peace and cooperation. If the UN is not effective enough

right then. He is wrong now. The writer, a professor of international law at Columbia University, was deputy assistant secretary of state for international organization affairs under President Ken-nedy. He contributed this to The New York Times.

... and That's Where a Smart Candidate Should Be

Dukakis replied with what he called an old Greek saying: "A fish rots from the head first.

His attribution to a Greek source cannot be faulted; the 16th century Dutch scholar Desiderius Erasmus translated the ancient Greek words into Latin - Piscis primum a capite foetet — most often rendered proverbially in English as "The fish stinks from the head."

The Dukakis etymology was im-peccable, but his political judgment was faulty. That not-quite-offhand barb was a blunder that will come back to haunt him. Such a heavy-handed shot invites a

retort in kind, encouraging Republi-can orators to point to the Dukakis education adviser just sent to jail for corruption in Massachusetts state contracts and to add, "as the man

independence from the Turks.

with Boston Harbor, the nation's worst cesspool of pollution, where far ahead: not that we loved Mike the fish are rotting because of inaction by the big fish in the Statehouse. More important, the Dukakis impu-

tation of venality to Mr. Reagan gives that beloved old warhorse a chance to take personal offense before a nationwide audience, and to make the campaign into a judgment of his record of peace and prosperity. That is precisely what Democrats seek to avoid. But the essence of the blunder is

this: If properly exploited, that foolishly excessive attack on Mr. Reagan's character will add to what polisters like to call "the negatives" in voter assessments of Michael Dukakis.

This campaign, more than most, hinges on those negatives. Mr. Dukaafter eight years in the national lime-

The Elgin Marbles Belong in Athens

By C.L. Sulzberger

The seventh earl of Elgin was

named British ambassador to the

Ottoman sultan in 1799. Thanks to

British support of Turkey against

marauding France, he managed to

extract from the sultan's govern-

ment authorization to make casts

and drawings in the Parthenon. He

thus managed, astonishingly, to re-

move and send to England more

than 15 sculptures and metopes. After Greece had won its war of

independence it declared officially

that "to these stones we owe our

this stunning injustice.

career, which in a sense continues,

Founded as a pagan temple, it has been Christian church, Islamic

mosque, ammunition storehouse;

but increasingly it has emerged as

the symbol of Greece's ancient glo-

ry. After Nelson's and Wellington's

victories over the French, Lord El-

gin expanded his plans for the Par-

thenon and greedily advised Parliament that though "it was no part of

my original plan ... I should wish

to collect as much marble as possi-

ble." He added, "I have other

places in my house which need it."

artistic gems from Turkish deprada-

tion. He embellished his home at

Broomhall, but eventually sold the

marbles to Britain through the muse-

um, stipulating that the collection

must be known as the "Figin Mar-

bles." (This is as if a painting by da

Vinci had to be called the "Jones

For years, during which I fre-

portrait" after a donor.)

He said he wished to "save" these

rebirth as a nation."

the Dukakis candidacy started off so

more, but that we loved George less. For Democrats, that delicious difference in negatives dictated a holding strategy: Lie low. Eschew liberalism and take no stands that make enemies. Not ideology, competence; not nostrums, normalcy. Conceal the agenda: Do nothing to arouse the passion that

would increase Dukakis negatives. As a result, the shouting at the Democratic convention, in response to a vapid, barren, themeless pudding of a speech by the nominee, was "We're gonna win!" I was reminded of the mindless shouting of "Four more years!" in 1972, another time when

kis takes great pains to point out that, paign to maintain the negatives gap,

quently visited Greece, I was influ-enced by the argument that the Elgin

Marbles were well off under British

care, and that a claim on them might

lead to similar claims by the nations

of famous artists whose works had

been taken abroad as a result of war

The 1816 agreement negotiated

Lord Elgin with the British spec-

or cupidity. Now I am not so sure.

ified that he would turn over to the

museum his collection for £35,000.

Ever since, starting with Byron and

Keats, prominent Britons have pro-

tested this curious and shoddy deal.

As Sir Philip Sassoon wrote while a cabinet minister: "After having vis-

ited the Acropolis to see the beauti-

ful and interesting things which Lord Elgin overlooked . . . I found myself wondering whether, after all, the noble ruins of the Parthenon

and the glorious atmosphere of

Athens would not be a better set-

ting than Bloomsbury for the most exquisite marbles in the world."

The present Greek government

may justly be criticized for many of

its actions, but it has gained respect

for its attitude on the Elgin Mar-bles. Culture Minister Melina Mer-

couri has attracted international at-

tention to the cause. In 1986, she

announced an international compe-

tition for the design of a new Par-

thenon museum to include the mar-

bles still held by Britain. The

museum will be finished in 1996.

Meanwhile, three great Greek poets

- Cavafy, Seferis and Elytis -

Greece has officially forwarded a

claim to the British government, and

plans now being achieved are based

on the assumption that what Lord

Flein was able to remove in the early

19th century will be restored to its birthplace before the 20th century

has ended. This assumption now ap-

pears to be well-founded.

have joined the cause.

winning mattered more than anything. In light of the Democrats' camwhat should the Republicans do, not

not expose the Dukakis record and ridicule the hidden agenda of the "Brookline dodger" without increasing his own negatives, so he needs a running mate who knows the ropes and can hit hard. Alan Simpson or George Shultz would be good, Jeane Kirkpatrick would be better, Jack Kemp would be best.

 Forget gratitude for prosperity

 voters never respond to that ap
 peal - but address the latent fear of recession. A forceful "Don't let them take it away" is a puissant answer to a

vague "Time for a change."

4. Take command of the terms of the debate. Excessive spending leads to inflation; redistribution of wealth through taxation leads to recession; weakness and ultralateralism lead to war. The only place in the world where freedom is losing today is the place where House Democrats have been rotting from the head.

If this game is played in the center of the field, the Republicans will never bridge the negatives chasm; if it is played on the right side of the field, Mr. Bush will win. Mr. Dukakis has decided the way to the White House is to run for general manager of the United States; the way for Mr. Bush to beat him is to run for president. The New York Times.

ABit of Ad The Obstacle Is in Beijing

By Michael Leifer

LONDON - Despite the inconchisive talks in Indonesia last month, a conventional wisdom has emerged about Cambodia. A political settlement of the conflict there is said to be in sight, encouraged by improving relationships between the big powers, particularly China, the Soviet Union and the United States.

The sticking point, however, is that if Vietnam continues to withdraw its forces from Cambodia, it will allow the Khmer Rouge, the strongest guera villa military faction, to reinstate its demonic rule in Phnom Penh. While the initial bone of contention was Vietnam's armed occupation of Cambodia, the issue now is how to deny

power to the Khmer Rouge.

Vietnam has refused to accept proposals for an international peace-keeping force to fend off the Khmer Rouge. So Prince Noradom Shanouk the former chief of state, has moved closer to compromise on the terms of a political settlement. The prince, everyone's choice as manager of national reconciliation, has detached himself from his partners in the resistance coalition, including the Khmer Rouge. He seems willing to accept a residual Vietnamese military presence as the only way to hold the ring as a transitional government takes over.

If Prince Sihanouk strikes a deal

with Him Sen, prime minister of the Vietnamese-backed government in Phnom Penh, Hanoi's geopolitical interests will be well served. His participation would legitimize a power-sharing arrangement which, by excluding the Khmer Rouge, would allow a balance of political advantage in Vietnames for the rose come countries with nam's favor. For some countries, such a balance would not be an intolerable price for a settlement, especially if it brought all the Indochinese states into a stable structure of regional cooperation:

The obstacle to a viable deal is not American foot-dragging, as some have suggested. It is China's obduracy. It is because of Beijing's dogged hostility that Hanoi has been prepared to accept heavy costs for nearly a decade in an effort to ensure an acceptable government in Phnom Penh. The conflict over Cambodia-is, above all, an expression of Chinese-Vietnamese enmity.
Vietnam invaded Cambodia in 1978

and removed the Khmer Rouge gov-ernment because it was regarded by Hanoi as an insidious agent of a menacing China. The Khmer Rouge army had repeatedly launched cross-border incursions into southern Vietnam. The return of the Khmer Rouge to power would not, by itself, pose a serious threat to Vietnam's security. It is China's patronage that remains the source of acute threat to Vietnam.

Beijing's policy is central to any resolution of the Cambodian conflict.

By William Safire

Only to win but to deserve to win?

I. Lannch an aggressive defense to reduce the Bush negatives. The fish rots from the head." Same thing an all-time high. That explains why depended on restoring normal relations between China and Vietnam. Moscow has a friendship treaty with

Hanoi and provides much of Viernam's economic and military aid.

It has been Beijing's determination to make Hanoi pay a heavy price for intervening in Cambodia that has made the Khmer Rouge an obstacle in the peace talks. China's military action against Vietnam in the disputed Spratly islands earlier this year was part of a continuing strategy of attrition. The military strength of the Khmer Rouge in Cambodia would be eroded over time if China, the main supplier of arms, and Thailand, which offers sanctuary to Khmer Rouge guerrillas, moved to cut off assistance and access.

So far, there has been no sign that Beijing is willing to give up its strategy of attrition against Vietnam, despite the improved tone of Chinese-Soviet relations. The Chinese know that any settlement in Cambodia that excludes the Khmer Rouge will leave Vietnam as the dominant power in Indochina. Beijing's refusal to tolerate such dominance, despite its steady rapprochement with the Soviet Union, has aroused apprehension in Southeast Asia about China's

long-term intentions in the region.
The irony is that such a view was integral to Washington's now repudiated policy of containing Chinese influence in Asia. That policy drew America disastrously into Vietnam. Vietnam has now taken up containment where the United States left off. But there is an important difference. Vietnam is joined in geopolitical perpetuity to China.

The writer, an Asian specialist who teaches international relations at the London School of Economics and Political Science, contributed this to the

100, 75 AND 50 YEARS AGO

1888: Slavery in Congo BRUSSELS - Cardinal Lavigerie

delivered an address at Stc. Gudule today [Aug. 15] on Slavery, in the course of which he made a violent attack on the Government of the Congo Free State, declaring that, of all parts of Africa, the Congo, which King Leopold pretends he is anxious to civilize, is the one in which slavery now flourishes most intensely and cruelly. The Congo Free State will doubtless answer the charges made against it.

NEW YORK - Establishing a new record for a trip around the world, Mr. John Henry Mears arrived in this city on Aug. 6, according to reports just reaching Paris]. He left here July 2 and completed the trip of 21,066 miles in thirty-five days, twenty-one hours and forty-three minutes. The best previous

days, nineteen hours and forty-three minutes made by M. Andre Jaeger-Schmidt, of Paris. Mr. Mears said that throughout his entire journey he never experienced a more exciting lap than his dash down Broadway last night in an automobile. "I am glad an American now holds the world's record," he said. "Although I only speak one lan-guage and M. André Jaeger-Schmidt spoke four of five languages, I did not lose any time on that account."

prisoners. The government has also ordered four Caproni bombers.

The Obstacle

A Bit of Advice for Bush: Be Clear on the Challenge

By A. M. Rosenthal

go right ahead and solve it, some-time before Election Day.

The puzzle: Mr. Bush, you have based a good part of your candidacy on the claim that your long, varied experience in national government particularly

ON MY MIND

qualifies you to deal with foreign affairs, especially any threat from the Soviet Union. How will you now persuade Americans that this is still of top importance, at the very time President Reagan himself sees the Soviet Union as more and more cooperative, boasts of his friendship with Mikhail Gorbachev and AND SOME PERSONAL PROPERTY OF THE PROPERTY OF thinks Soviet threats are fading rapidly?
From this question flow others, a list of deep philosophical and ethical im-

portance to the country. Are you persuasive enough to per-suade the American people that it is still in their interests to keep spending hundreds of billions of dollars each year to hone the U.S. military gnard against the Soviet Union, when Moscow is signing arms control agreements with us, getting out of Afghanistan, campaigning to strengthen the United Nations, making dramatic reforms at home? Is it necessary

to the future to spend that much money, or are we still reacting to the past? Can you spell out clearly the differences between a reformed Soviet society, assuming it comes about, and American values? Can you do it with enough passion and conviction to make Americans agree to go on sacrificing for allies that

are increasingly infatuated with the Soviet Union and show increasing competitiveness and distaste toward America? Can you persuade Americans to go on struggling for political and religious liber-ty in the Soviet Union when American national interests may not be clearly at stake and U.S. commerce with the Soviet Union might suffer? Should you even try?

Have the changes in the Soviet Union been so sweeping and lasting that remaining differences are merely a matter of national style and taste, not worth quibbling about? Or are we confusing permanent reform with Mikhail Gorbachev's desperate need to patch

N EW YORK — With utmost amiability, Ronald Reagan has created a devilishly difficult political puzzle for George Bush and invited him to properly the shead and column to the state of the shead and column to the state of the shead and column to th nice. But, Mr. Bush, do you think Mr.

Gorbachev is our friend?

Is Soviet imperialism still a threat?
Where? If not, should Americans not simply keep their nuclear powder dry and mind their own business instead of pushing for more freedom in the Soviet Union and Eastern Europe? If many Soviet political prisoners are

freed, should Americans keep fussing about those still in cells? I had the chance to talk with Mr.

Bush, flying over Pennsylvania in his plane; I raised the issue of presidential leadership in the Gorbachev era. This is the nub of what he replied:

The very fact that we are in a period of change with Moscow makes experience like his more important than ever. He will make it clear that the United States is the leader of the free world, not just another player in the universe of multilateral consultation and timidity, which is how Mr. Bush sees the Dukakis foreign policy. But he will pay increasing attention to America's allies, showing them early on that the United States will not retreat into isolation or decouple from them.

Mr. Bush is intelligent, sophisticated and reasonable, and so were his answers. But they were not thrilling emotionally or intellectually. That may have been the fault of the questioning, or perhaps Mr.
Bush is not ready to challenge Ronald
Reagan's glistening vision of himself as
peaceful conqueror of the Evil Empire.

But the questions remain. Millions of Americans see the struggle with the Soviet Union not simply as a military and strategic contest but as a philosophical and ethical assertion of the values of free societies against the very concept of tyranny and dictatorship. Is tyranny dead in the Soviet Union, the struggle won? Is it worthwhile to keep up pressure to expand liberties in an authoritarian but more decent

Soviet Union? Why? How? Those Americans who are instinctively repelled by dictatorships of left or right will have to think all those questions through, soon and deeply. Mr. Reagan never even tried to answer them. It would be useful to hear clearly from Mr. Bush. The New York Times.

was heard of the ship or those aboard for more than two years until reports came

In the decade after the Trial tragedy, settlements along the north coast of New South Wales depended on shipping for South Wales, has been stormy. For all supplies and for getting produce to marits loveliness, this wide inlet facing the ket. Most of the ports were inside river entrances, with shifting dangerous bars. In the 1860s an engineer named Ed-

ward Moriarty came up with the idea of building a breakwater to project about 1,500 meters (5,000 feet) from a head-LOW meters (3,000 feet) from a head-land called Laggers Point. The magni-tude of shipping losses along the north coast lent urgency to his proposal. From 1863 to 1866, 79 sailing ships and 10 steamships were lost, drowning 243 peo-ple, in 1870, the Australian government

approved the building of the harbor.
While Moriarty was drafting his plan for a breakwater, Harold Maclean, an enlightened prison administrator, put forward a proposal for a jail in which men serving long sentences could be put to useful tasks under relatively lenient discipline, thus learning skills and even earning a little money. In 1875, he and Moriarty persuaded the government that the Trial Bay breakwater would be a suitable project to test Maclean's proposal, using prison labor to quarry stone.

It was a marriage of two splendid

ideas. But the project was doomed almost from the start. Instead of the cheap, moderate security jail proposed by Maclean, the politicians insisted on a fortress, to be built out of the extremely hard local granite. It took 10 years to complete, with the first prisoners and warders occupying it in 1886.

The Trial Bay jail seems to have been a model of relative decency in a brutal

age. No inmate was ever flogged. Unfortunately, the breakwater that was to have justified the jail's existence proved to be a dreadful mistake. Prisoners labored with steam-driven drills and explosives to quarry the granite. Horse-drawn trolleys on rails hauled the huge blocks, each weighing an average of 8 tons, to the breakwater site.

But Moriarty had underestimated the ferocity of the winds and the ocean. No sooner did the breakwater reach about 60 meters into the sea than half of it was washed away. By the end of 1902, 13 years after work had begun, the breakwater measured 300 meters, just a fifth tional Herald Tribune.

of its proposed length. For every meter that stood, another had been washed away. In 1903, the venture was aban-

doned and the jail closed.

That would have been the end of the story had it not been for World War I. in of a wreck being sighted. In 1817, a search party found what was left of the Trial, but no trace of survivors.

story had it not been for World War I. In 1915 enemy aliens were interned and it was decided to house single men at Trial Bay. More than 500 Germans,

many of them well-educated and with private means, spent most of the war there. They had been rounded up not just in Australia but also in Ceylon, Singapore, Hong Kong and the Pacific islands. The internees included scientists, planters, businessmen, artists military and merchant marine officers; and even a group of Buddhist monks. Their life at Trial Bay was hardly.

ardnous. Free to use the beach and the headland during daylight, the Germans built tennis courts, beach huts and even a café outside the walls of the jail. They formed an orchestra and a drama group, Both gave regular performances in a mess hall. The men also established a vegetable garden and ran their own newspaper, Welt am Montag. Translations of some of the news-

paper's contents are a reminder that loss of liberty, even in the most agreeable surroundings, sears the soul. "So we sat right in traps," one prisoner wrote, "nothing more but that horrible inherited castle, the sea, and the sea again, and the big unfulfilled long-

ing for freedom and home."

The internees remained at Trial Bay until May 1918, when reports that the Germans might be planning an attempt to rescue them led the authorities to transfer them to another camp. Six died while incarcerated at Trial Bay, and the Germans had a monument erected to them on a hill overlooking the prison. It is a measure of the sentiment prevailing at the end of the war, in which 60,000 Australians were killed, that the heavy gramite monument was destroyed in 1919 by local people using explosives. It was restored in 1960 with funds supplied by West Germany, this time with the

help of Australian residents. As for the jail, its roof, gates and all movable parts were auctioned off in 1922. The ruin now makes a jolly outing for tourists and a fine setting for movies.

The writer, an associate editor of The Age newspaper of Melbourne, recently completed a seven-month journey around Australia while researching a book. He contributed this comment to the Interna-

LETTERS TO THE EDITOR

Issues, Yes, but Whose?

Regarding "Philippines: Aquino Must Stop This Drift to the Left" (Opinion, Aug. 8) by Francisco S. Tatad:

It is amazing to see agrarian reform, foreign debt, U.S. bases and nuclear weapons described as inherently Communist issues. A majority of the Senate (all but one elected on President Corazon Aquino's ticket) favored stronger agrarian reform than was finally adopted, back a ceiling on external debt service, oppose entry of atomic weapons into the Philip-pines and seek either a phaseout or a very high rent for U.S. bases.

Many Philippine politicians, including the Senate president, Jovito Salouga, have been concerned with these issues for 30 years or more. How can one say that post-Marcos Communist Party tactics have shaped their agendas?

The coalitions seeking more action on these issues are predominantly center to center-left. Their proposals are, in Communist terms, reformism that would reduce conflict if adopted, weakening both the New People's Army and the far-right private armies and vigilantes. They have set this agenda because the basic security problems of the Philippines are poverty, low availability of public education and health services, and economic injustice. To squeeze out the center and center-left is not a recipe for reducing support for the Communists or for reducing violence; quite the reverse is true.

REGINALD HERBOLD GREEN.

The Tokyo Stock Scandal

In his article on the Recruit Cosmos scandal ("Tokyo Affair Points Up Cor-ruption." July 11), Patrick Smith writes that aides of the governing Liberal Democratic Party purchased shares of the company before the concern was listed on the Tokyo Stock Exchange. In fact, Recruit Cosmos shares have never been listed on that or any other stock exchange and have been traded over-thecounter only since October 1986. The scandal centers on the aides' purchases of shares before Recruit Cosmos became a publicly owned corporation.

GENERAL NEWS

Enzo Ferrari, Car Designer, Dies at 90

MODENA, Italy — Enzo Ferrari, 90, founder of the Italian automobile company and designer of some of the world's most speciacular racing cars, died Sunday.

Mr. Ferrari dominated the Ital-

ian motor racing scene during a long career that saw his scarlet Formula One cars reap nine world championships, a feat unmatched by any other stable. The cars, whose emblem is a distinctive prancing black horse, are a source of deep national pride in Italy.

Mr. Ferrari had been seriously ill with kidney problems for some time. The company announced his death Monday.

A former racing driver who started to make cars under his own name in 1943 at a small factory at Maranello, south of Modena in northern Italy, Mr. Ferrari once said: "My real passion was never to drive cars but to create them."

After more than 30 years of producing Grand Prix winners, he still put in a regular working day and always kept a close eye on the dayto-day running of his racing team. Mr. Ferrari rarely traveled far from Modena, preferring instead to follow his teams on television or by

A tall, silver-haired man with a commanding, and sometimes in-timidating social manner, Mr. Ferrari never lost his uncanny ability to spot and recruit talented drivers

for his Grand Prix teams. The list of drivers who piloted Ferraris over the years reads like a motor racing hall of fame: Alberto
Ascari, Juan Manuel Fangio, Wolfgang Graf von Trips, Michael
Hawthorn, John Surtees, Niki
Lauda, Michele Alboreto and Ger-

hard Berger.
Despite his successes, Mr. Ferrari was often at the center of bitter controversy following fatal accidents involving his drivers. He stood trial in 1957 on manslaughter charges but was acquitted on all

Lacking a 'New Vision' for '88, Party Gropes for Campaign Strategy

Washington Post Service
NEW ORLEANS — Have the Republicans run out of fresh ideas?

In the last two presidential campaigns, they prided themselves as being the party that had brought new thinking to the national debate. In 1980 it was a bold plan to slash taxes, cut domestic spending and rebuild U.S. defenses. In 1984 it was President Ronald Reagan's vision of turning 40 years of nuclear-deterrence doctrine on its head with the Strategic Defense

But this year the Republican Party has written a platform and launched a presidential campaign that appears to say: Our ideas are working. Keep us in office and we will keep

them in place, with some fine tuning.
This Republican appeal and the Democrats' evident determination to blur ideological distinctions have set the tone for a campaign in which the differences between the two parties appear more muted, the passions of their activists more controlled and their arguments less focused on change than might be expected with two nonincumbents competing for the presi-

The Republicans intend to use their convention to raise the stakes for the fall campaign,

NEWS ANALYSIS

with a lineup of speakers poised to attack the Democratic nominee, Governor Michael S. Dukakis of Massachusetts, as a "stealth" candidate who is hiding an ideology they contend is outside the American political mainstream on defense, crime and taxes.

But their effort to demonize Mr. Dukakis, successful or not, will do little to focus the campaign on the "what next" question that has been a Republican emphasis the past few cam-

Foreign Visitors Are Taking Notes At U.S. Conventions

By Barbara Vobejda

WASHINGTON - When the Republican National Convention opened Monday night in New Or-leans, Edward O'Reilly was there watching mingling with the players and studying their moves, taking in the political spectacle with the watchful eye of a stranger.

If this chaotic, quadrennial exercise amuses Americans, imagine how it appears to Mr. O'Reilly, one of hundreds of foreign visitors at the convention.

Mr. O'Reilly, general secretary of the Irish opposition Fine Gael Party, is in New Orleans as a guest of the U.S. Information Agency. The agency is sponsoring the visits of 40 foreign government officials, journalists, academics and community leaders. An additional 250 to 300 political leaders from around the world are attending the conven-tion with the help of the National Republican Institute for International Affairs. And close to 100 ambassadors will be at the convention Wednesday and Thursday.

For some of these visitors, the convention is a chance to dive into a quintessentially American experience and learn about the political process. For others, including diplomats and their political staffs already steeped in American politics, the convention is a means of gauging what may lie ahead in areas such as trade and defense policy, which carry critical ramifications for governments abroad.

Even the most experienced foreign observers say they are fascitricities of an American political

"I'm absolutely staggered how little policies are an issue and how much communication is the issue," said Mr. O'Reilly after two weeks of traveling around the United States talking, reading and learning about politics. In Ireland, he said, things are different: while the candidates' "skeletons in the cupboard" are part of the campaign debate, "their public responsibil-ities would be the issue."

In New Orelans, he said, "I have heard so much of that political gossip, and it's all the same. I'm absolutely shocked by how little talk there is about the deficit."

NEW ORLEANS - The speeches have been assigned like parts in a play. The themes have been picked, polished and prepared for presentation, one a day, like vitamins, to meet the daily adult requirement for a complete and balanced message. The Republicans would like that

message to be that George Bush is a man of leadership and experience, ready to build on the record of Ronald Reagan, and that Michael S. Dukakis is too liberal, too inexperienced and too unpredictable to

Getting the message out, as far as Mr. Bush's handlers are concerned, is the main purpose of the conven-

Even in an age of carefully or-chestrated politics, the convention stands out as the product of many

people planning over many weeks. The Bush campaign leadership has known for a certainty since March 16, the morning after their candidate won the Illinois primary, that on the final night of the Re-publican National Convention here five months later he would be at the podium accepting the party's

So they have been free to pour all their energy into making sure that the message is presented properly at the convention and, perhaps even more important, that much of it will actually be broadcast on television and written about in the

ewspapers. Like a television mini-series, the Republican National Convention will offer a theme a day, convention

organizers said. The theme Monday was the success of the Reagan administration, now known as the Reagan-Bush the convention by the party's hero, President Ronald Reagan.

Tuesday will be comparison day, with a series of speakers trying to build a case for Mr. Bush's strengths and Mr. Dukakis's weak-

Wednesday, the day when the nominating roll call will be held, will be geared toward accentuating Mr. Bush's qualifications for office. Thursday night will offer the nomination of Mr. Bush's running mate, whose identity will be one of the few surprises of this entire week. But the main event will be Mr. Bush's acceptance speech to the convention, possibly the most important address of his political

The campaign has programmed speakers with such precision that Fred V. Malek, the convention manager, was able to describe how much time different sorts of people would be at the podium. He said 11 percent of the time at the podium the speaker would be an American

PARTY: Republicans Celebrate (Continued from Page 1)

neurial, Republican-produced success more ironic than here.

In the years of the Reagan presidency, no state or major metropoli-tan area has been hit harder than Louisiana and New Orleans, Failure, not success, has been the hallmark of this area. Following the collapse of the oil industry, economic crisis has gripped the region.
Unemployment in Louisiana
Orleans has tried to put on its most stands at nearly 12 percent, the highest rate in the United States. In New Orleans, the unemployment rate is about 10 percent — double years alone, Louisiana has lost

105,000 jobs. The state has teetered on the years of deficit spending. State and

has been a great strain to maintain the present levels of transportation, police and fire services. The real-estate market is deeply

depressed, since many people have left to find work elsewhere. Forsale signs abound. The situation is so bad that The New Orleans Times-Picayune led its real-estate section on Sunday with an article headlined: "Need a house? Try a

optimistic face for the Republicans. A local booster on the city council tried to pitch the "all's the national rate. In the last four in a highly original way. well" line to reporters the other day New Orleans is now such a pris-

tine city, she said, that prostitution has been eliminated. The reveling verge of financial collapse after Republicans are in a mood to be lieve just about any tale of success, local debts have risen sharply. Castle of Glass *Graces Ottawa M. State of the least of the le

By Paul Goldberger

New York Times Service
OTIAWA — Seeing the sprawling new National Gallery here makes it hard not to wonder if there are not two Moshe Safdies. For there is a world of difference between this building, which is the architect's latest completed work. and the tower he recently designed for Columbus Circle in New York. The massive, angular New York

tower, which was not built (it was replaced with a design by another architect), looked as if it would have been a harsh and overpowering presence. The Ottawa museum is a sumptnous, even joyous piece of civic architecture, almost noble in its public monumentality.

It is no exaggeration to say that the National Gallery at last fulfills the promise Saldie showed when more than two decades ago he built Habitat, the innovative housing complex designed for Expo 67 in Montreal, by stacking prefabricated concrete units into a form of great sculptural power.

While his career since then has hardly been insignificant, it began so spectacularly that much of what has followed has seemed disappointing. There have been times, and Columbus Circle was one of them, when Safdie seemed more interested in taking a polemical stance against the drift of architecture toward postmodernism than in designing the best possible buildings. But the National Gallery brings Safdie back to real architecture, with a splendid sense of self-

It wears its modernism naturally, without the self-consciousness that seems to descend upon so many modernist buildings designed in our age. And, so far as style is concerned, it is hardly a purely modern building anyway — it is full of elements that allude to the and zestful; it has all the crisp, architecture of the past, but with-out the strained, forced quality of comments recommend to the past, but with-figh-tech energy of the glass space-frame trusses of LM. Pei, but its so much postmodernism.

Enough about style, which is not monument is a central building have rarely been solved as thoughtfully as at Ottawa. Safdie has creat- zles us. ed a castle of glass, concrete and showmanship as any major musethe sense of extravaganza never gets in the way of the art.

cle that characterizes the public, given how truly excellent the inside spaces of this building and the ar- of this building is, it is worth it.

izes the galleries: At Ottawa, it is possible to be exhilarated one moment and pensive the next.

The museum is on a promontory on the banks of the Ottawa River, overlooking Canada's Gothic Re-vival Parliament complex and adja-cent to Ottawa's modest city center. It is a dramatic site, part of both civic and commercial Ottawa, and Safdie responded to it with a

highly complex form.

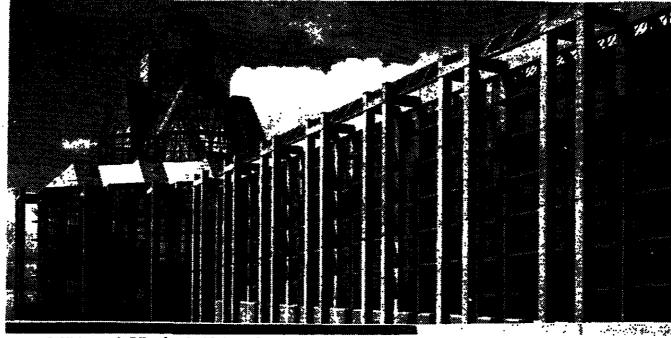

The building is shaped roughly like an L, with the public spaces wrapping around the galleries, which are themselves built around two central courtyards. Special wings for curatorial, administrative and conservation work extend off the main L-shape on the side facing the river; the major public spaces face the city and Parliament.

The museum is built largely of pink Canadian granite and precast concrete, with what can only be The glass forms spectacular, tentlike pavilions that in the few weeks since the building's opening have become the National Gallery's trademark; they give it a profile on the skyline, and their image has found its way onto souvenirs.

The prismatic pavilions loosely allude to the shape of the Parliament Library, the most lyrical part of the Victorian Gothic Parliament complex, and they are far and away the best aspect of the exterior, which from many sides is rather awkward, even graceless.

The museum is entered through a corner pavilion of glass and concrete, roughly 70 feet (21 meters) high at its central point, that faces both Sussex Drive, the museum's address, and a large and unfortunately rather barren front plaza. From within, the pavilion is warm prismatic shape, which can be thought of as resembling layers of the point here. The museum as civic tents or gables mounted one atop the other, gives it a degree of amitype of our time, and its problems ability that is very much its own. It is a friendly space, even as it daz-

This is a building designed from granite that possesses as much the inside out, not from the outside in, and while that priority has um of the last generation, but here yielded a superb experience for the museumgoer (and a much better than usual one for the staff) there is There is a remarkable balance a price to be paid for it, and it is in between the architecture of specta- the coherence of the exterior. But, Contract Table (Street, No. 2000) by Contract,

all ignored today, he said. People insist on novelty, Zapf

world periodically have forced changes in these classic forms. A shortage of parchment in the Middle Ages, for example, made monks try to squeeze as many letters as possible into a line, and from this evolved fraktur, the angular Gothic German lettering.

It was hard for Zapf to describe exactly how he goes about inventing an alphabet and how to make it easy to read and pleasing to look at. The requirements of the commission come first of course. Melior, a newspaper type he designed in 1952. had to be spare and simple legible in bad light on cheap paper. Type-

Don't Squeeze His Alphabet

By Michael Kernan Washington Post Service RLINGTON, Virginia — Her-

Amann Zapf and 600 other people from around the world came to Arlington to celebrate the alphabet as a work of art. They covered the Marymount University campus with their beautifully inscribed signs. Their elegant graffiti sprawled across the corridor walls on special strips of paper.

The world's greatest calligraphers were here for Letterforum, the eighth annual International Lettering Arts Conference.

And Zapf, perhaps the dean of them all, had come from Darmstadt, West Germany, to lecture and give workshops. Zapf, bright-eyed and nimble at 69, writes books on calligraphy and designs books. He also designs typefaces. This precise and self-assured artist designed Chancery type, and Palatino and Melior, Michelangelo and Sistina and Optima. He has designed type in the Greek and Arabic alphabets, Cherokee, Pan-Nigerian and the mathematicians' Euler, His letter-

ing is seen all over the world. One thing that bothers Zapf and all those who see the beauty of lettering - is the modern tendency to crowd letters together. It's an infection, he says. "The Americans, Madison Avenue, invented sexy spacing, as it's called, the letters actually kissing. It's too close you can't read it easily."

Fifty years ago American researchers discovered much about legibility and what makes one sign asier to read than another, but it is

said, and do not appreciate the rightness of classic forms, based on stark portraits of a single magnifihuman proportions, that have cent letter, Zapf muttered, evolved through centuries of an-don't make enough noise. We don't

faces for books could be far more detailed. Beyond that, it is a matier of experience and the artistic eye "knowing what is wrong."

Zapí wanted to be an electrical engineer, but his father was a trade union leader blacklisted in the 1930s by the Nazis. Young Zapfsuddenly found that he could not get into the schools he applied to. Eventually he became a designer at the Stempel type foundry in Frank, furt. Conscripted during World. War II, he spent the years with a mapmaking unit in southern France, making line drawings of flowers during his spare time. After the war he returned to Stempel as art director, turning out one influ-

ential design after another. He has been a consultant for the likes of Hallmark and Xerox, has lectured at Harvard, has written books that are the standard in the field. His wife. Gudrup, is also a calligrapher and book designer.

"In the old days they studied beautiful manuscripts," "and even today people collect illuminated manuscripts, and muse-ums exhibit them. But not new work. In China and Japan writing is highly respected, and calligraphy is seen as a fine art. Here, pobody knows about it."

The day will come, he said, when the public will at last really see the excruciating beauty of plain letters. in whichever of the thousands of alphabets now in existence, whether as a full quotation or as individual letters or even parts of letters. Will want to pay money for it. Will frame it and hang it in the living room. Will go to galleries to see shows of it.

As he studied a roomful of calligraphic art, paintings, sculptures, biblical quotations, letter melanges, cient Greek and Roman design. make happenings on the street. We Through history, the hard re-quirements of the commercial wants big. They ignore us."

WIN \$ MILLIONS!

Strike it rich in Canada's Favorite Lottery. You pick your own numbers playing Lotto 6/49

That's right ... you can win millions by picking your own numbers playing Lotto 6/49—Canada's most popular Government Lottery. In fact, last year Lotto 6/49 paid out \$354,736,589.00 in ALL CASH PRIZES. And it's all free of Canadian taxes. There are two draws each week for a grand prize guaranteed to be not less than \$1,000,000.00 with many millions more in secondary prizes. Grand prizes often run into the millions and have been as high as \$13,890,588.80. Imagine what you could do with that much cash! This is your opportunity to find out because now you can play the lottery that's making so many millionaires in Canada.

WHAT IS LOTTO 6/49? Lotto 6/49 is the official Canadian version of

Lotto-the world's most popular form of lottery. It's the lottery in which you pick your own numbers and it's called "6/49" because you select any 6 of 49 possible numbers from 1 to 49. Your numbers are entered in the Lotto 6/49 computer system and if they match the six winning numbers chosen in the draw-you win the grand prize. Or if you have only 3, 4 or 5 numbers correct you win one of thousands of secondary prizes available.

HOW CAN I PLAY?

Complete the attached order form and send it to Canadian Overseas Marketing along with the necessary payment. We will enter your numbers for the specified length of your subscription. You may select from 1 to 6 games for 10, 26, or 52 weeks. Each game gives you † Canadian Oversees Marketing is a private company. The prices quoted herein include handling and mailing costs.

another chance at the grand prize for every draw in which you are entered. You receive a "Confirmation of Entry" by return mail acknowledging your order and indicating the numbers you have selected as well as the draws in which they are entered.

HOW DO!KNOW WHEN!WIN?

complete list of all winning numbers will be sent to you after every tenth draw so that you can check along the way to see how you are doing. At the expiration of your subscription you will be sent a final statement of your winnings. All prize money will be converted to any currency you wish and confidentially forwarded to you anywhere in the world. So mail your order today—the next big

winner could be you.

Tables include the nationwide prices up to the closing on Wall Street and do not reflect late trades elsewhere N.Y. Stocks End Sharply Lower

NEW YORK - Prices ended sharply lower Monday in slow New York Stock Exchange trading that dominated by takeover and dividend plays as worries over inflation and higher interest rates kept many potential buyers on the

The Dow Jones industrial average, which fell 81.61 points last week, plunged 33.25 to 2,004.27.

Declines trounced advances by about a 7-2 margin. Volume fell to about 128.56 million shares from 176.94 million traded on Friday. Broad-market indexes also fell. The New York Stock Exchange index was down 1.95 to 146.58. Standard & Poor's 500-stock index lost 3.86 to 258.69. The price of an average share lost 41 cents.

Much of the activity was centered on takeover and dividend-related stocks.

Big Board volume included nearly 8 million shares of GTE, which goes ex-dividend Tues-day. That meant Monday was the last day an investor could purchase shares and still collect the 6.6 percent dividend. "I think everybody else has just vacated the

arena with very low conviction levels and high anxiety levels," said Michael Metz, a market analyst with Oppenheimer & Co. Long-term investors have been on the side-

lines for a good while and they're not going to enter in this environment." he said.

Shortly before the market opened Monday, the Federal Reserve Board reported that indus trial production rose a seasonally adjusted 0.8 percent in July. The stronger-than-expected rise follows an increase of 0.4 percent in June.

The news, which came on the heels of other

government reports indicating the economy is expanding at a healthy pace, renewed concerns about inflation as strong domestic and export demand pushes the nation's industry to its peak. Analysts and traders, however, said they did not believe the industrial production report in itself had a significant impact on the market.
"It's just a little bit more of the same from last

ment strategy at Wheat, First Securities in Richmond, Virginia. Mr. Hays, noting the slow volume, said potential buyers were awaiting the various eco-nomic reports due out this week. "The trade

deficit is probably the big news," he said.
"But I don't expect all that much on the upside either," he said. "If the economy stays so remendously robust, it scares the people who fear that every time inflation goes up, interest rates will go up and wreck the economic recov-

Higher interest rates tend to draw investors away from stocks and into the bond market. On the trading floor, GTE was the most active NYSE-listed issue, down 14 to 40%. National Semiconductor followed, off ¼ at 9.

INTERNATIONAL STOCK MARKETS

Foreign Investors Cautious About Tokyo's Steady Rise

Los Angeles Times Service

OKYO — Despite a dip last week caused by interest-rate fears, the Tokyo Stock Exchange's prospects for the next few months could not be brighter, in the view of most analysts here. But foreign investors are viewing the market's rise with more than just a note of caution.

The Nikkei average of 225 stocks, which set a record on April 7 and has generally maintained its upward momentum, could reach 31,000 by year-end, according to Keiji Yasuda, general manager of the international department of New Japan Securities Co. The Nikkei closed at 27,833.51 on Friday, down 528.67 yen from the previous Friday, during a week in which the U.S. Federal Reserve Board raised

its discount rate to 6.5 percent from 6 percent. On Monday, the Nikkei rose 67.78 to 27,901.29 in very slow trading. Buoyed by Japan's booming economy and persistent trade surplus, prices here have been rising while many other kept rising while many other

markets still reel from the ef-

Share price manipulation is seen by outsiders as the prime bugaboo.

fects of last October's panic. The exchange's aggregate value of listed stocks is \$3.2 trillion, compared with \$2.44 trillion for the New York Stock Exchange. But foreign investors have been put off by a lack of restraints on price manipulation and insider trading and by the fact that share prices in Tokyo are very high—about 69 as measured by the ratio of stock price to appear a process. That compares with an of stock price to annual per share earnings. That compares with an average price-earnings ratio of about 15 on the NYSE. Foreigners now hold only 3.6 percent of Tokyo's stocks,

compared with a peak of 8.6 percent in 1983. Foreign observers of Kabutocho, Tokyo's counterpart of Wall Street, are perhaps most disturbed by the market manipulation—
or the expectation of it—that in Japan has the effect of
bolstering rather than diminishing investor confidence.

HE DAILY WHIPSAW of individual share prices is believed to be easily controlled by companies investing in their own stock through secret accounts, by cartels of fund managers, by big brokerages pushing particular issues in aggressive sales campaigns and by clandestine speculator groups.

Brokerages often take the lead directly. Exchange authorities, for example, found that between Feb. 29 and April 2, corporations, individuals and foreigners were all net sellers but that 34 leading Japanese brokerages were net buyers.

Eighty percent of the price movement on the first section of the market is man-made every day," one foreign analyst said. "On the second section, it is 90 percent, and on the over-thecounter market, it's nearly 100 percent."

Restraints on other questionable practices are few. In July, for example, the market did not skip a beat when a scandal broke over the disclosure that shares in Recruit-Cosmos Co., a real estate concern with \$1.7 billion in annual sales, were made available to a select group of 76 leaders before quadrupling in value as they were listed for over-the-counter trading.

Meantime, the abolition of tax exemptions on savings accounts that went into effect April 1 is attracting more individual Japanese investors into the market, relatively undeterred by prospects of a reform that would subject all individual shareholders to

Back in 1950, these investors accounted for 69 percent of the total Tokyo Stock Exchange investment. But the figure plunged as prewar zaibatsu, or financial cliques, regrouped through crossholdings of stock, and it declined further as large companies, led by Toyota Motor Corp., started rounding up stable stockholders" in the mid-1960s to fend off foreign takeover bids.

Shares of major corporations owned by such stable stockholdfirms and other percent in 1965 to 60.8 percent in 1975 as Japan lifted controls on the end of the year. foreign investment. Now, the figure stands at 66.3 percent.

GE to Sell Chip Unit To Harris

Division's Sales Are \$550 Million

NEW YORK — General Electric Co. has agreed to sell its \$550 million-a-year Solid State division, which makes chips for automotive, industrial and military markets, to Harris Corp., the companies said Monday. The price was not dis-

GE, based in Fairfield, Connecticut, said the chip unit did not fit into its strategy of focusing on businesses in which it has global leadership.

The company was, in effect, con-ceding its chip unit is too small to compete with the semiconductor

ndustry leaders. NEC Corp. of Japan is the world's largest seller of chips, with revenue of more than \$3 billion last

Toshiba Corp. and Hitachi Ltd., also of Japan, were in second and

A GE spokesman said the Solid State unit was profitable but he

could not be more specific.

The division, which includes semiconductor operations acquired in GE's purchase of RCA in 1986, ploys about 10,000 people, GE said. It has headquarters in Somerville, New Jersey, and plants in Findlay, Ohio; Mountaintop, Pennsylvania; and Cupertino, Cali-

Not included in the sale is GE's Microelectronics Center in Research Triangle Park, North Carolina. The center makes chips for military purposes but only for use in GE's own products.

Harris, which has headquarters in Melbourne, Florida, also produces communication and information processing equipment and

office automation equipment.
Harris said the purchase would "complement and reinforce our own successful semiconductor

It said the transaction would unite two of the industry's leading makers of an advanced chip, the complementary metal-oxide semi-

Harris's own Semiconductor Sector employs about 4,000 people-worldwide and has annual sales of about \$300 million.

The deal is subject to the conclusion of a definitive agreement and corporate and government reviews.

Under its new chairman, Lawrence G. Rawl, Exxon has reorganized its operations and cut staff.

Exxon Thought Ready to Expand

World's Largest Oil Company Has \$2 Billion in Cash

NEW YORK — The world's largest oil company, Exxon Corp., having trimmed its staff and sold many nonoil businesses, has \$2 billion in cash with which to expand its oil holdings and profits in a period of depressed petroleum prices, industry

"There's a tendency among investors to flee to Exxon when there's uncertainty about oil prices," said George Friesen, an analyst who follows the company for Dean Witter Reynolds Inc.

Part of this attraction comes from a \$10 billion stock repurchase program over the past five years. But with \$2.04 billion in cash and a long-term debt to capital ratio of 13 percent, Mr. Friesen said,

Exxon could make a major acquisition and "could leverage-up very considerably without affecting" its triple-A debt rating.

Exxon is rumored to be looking at the oil and gas properties Tenneco Inc. put up for sale this year, while its 70 percent-owned Canadian unit, Imperial Oil Ltd., is seen as a suitor for the 78 percent stake that troubled Texaco Inc. has in Texaco Canada Inc. Exxon is not divulging its plans. "It is our

corporate policy not to comment on rumors of acquisitions and mergers," a spokeswoman said. After the oil price collapse of 1986, Fxxon sold off its electric motor business, its New York headquarters and its nuclear power operations, focusing on its core oil and gas and chemicals business.

At the same time, under its new chairman, Lawrence G. Rawl, it reorganized operations and thinned management ranks. It has cut its work force by 7,000 in the past two years and now has 100,000 employees worldwide, down from 182,000

"The company is super-efficient," said Sanford Margoshes, an analyst at Shearson Lehman Hut-ton Inc. "One of its characteristics is its extreme

Although earnings declined 9.7 percent in 1987, to \$4.8 billion, Exxon said it had gained \$375. million from the reorganization - far more than the \$319 million charge taken for it in 1986.

Earnings are also returning this year as gains in

earnings rose to \$2.65 billion from \$2.2 billion a year

earnings rose to \$2.65 billion from \$2.2 billion a year earlier. Excluding a special gain in the prior year, second-quarter 1988 earnings were up 30 percent. The pace in earnings should continue for the rest of the year, with analysts looking for 1988 net of about \$3.60 a share, up from \$2.65 in 1987.

Despite depressed oil prices, analysts pointed out, Exxon has offered a stable return to investors in the range of 30 percent a year, including reinvested dividends for the past five years. Dividends

vested dividends, for the past five years. Dividends have risen each year since 1981.

Although Royal Dutch/Shell Group and British Petroleum Co. PLC have both had better returns,

analysts said they have benefited from currency gains resulting from the lower dollar.

"Exxon has been practically the best performing oil company in recent years," said Kurt Wulff, an independent oil analyst who aided the New York-based invertee Cold C. John is his nevert and the present of the product of the present based investor Carl C. Icahn in his recent, unsuccessful battle for control of Texaco.

Exxon stock, which closed Friday at \$46.375, sells at about seven times estimated 1988 cash flow; the 55 cents a share quarterly dividend yields 4.8 percent. Royal Dutch yields just under 6 percent. "Exxon's stock price in relation to net income

and cash income tends to be generally on the full side for a very good reason: it's a superior compa-

," Mr. Margoshes said. But Exxon has been criticized for not making a najor acquisition during the big oil mergers of the 1980s and for spending too little on oil and gas properties. Exxon, in turn, has said that it has reviewed most properties offered for sale but found many of them too expensive.

And, since 1984, the company has spent about \$3.3 billion on the equivalent of 830 million barrels of oil reserves, an average of \$4 a barrel. Its reserves stand at about 13.9 billion barrels, while its record of reserve replacement is second only to that of Royal Dutch over the past three years, according to Fred Leuffer, an analyst with C.J.

Lawrence Morgan Grenfell Inc.

Exxon said it has replaced 109 percent of the reserves it has consumed in the past five years. Last year, it spent \$1.3 billion on the acquisition of leron Oil & Gas Co. in the United States an made up for a shortfall in production. Six-month Delhi Petroleum Proprietary Ltd. in Australia.

pressures.
The Federal Reserve Board said. the July advance, widespread throughout manufacturing industries, reflected heavy demand for electricity during the summer heat

The July advance was double the 0.4 percent increase in June and marked the 10th consecutive month that industrial output has risen. It was the largest increase since a 1.1 percent rise in October.

"The economy has a tremendous head of steam," said Allen Sinai, chief economist of Boston Co. "It increasingly looks like an old-fashioned boom in the industrial sector. with strong demand and production pressures bringing on infla-Many economists had been ex-

pecting a strong increase, given the fact that the Labor Department had reported that manufacturing employment rose by 68,000 jobs in

July, the largest increase this year.
We are seeing an industrial sector that is surging under the impact of increased exports and higher capital spending," said Jerry Jasin-owski, chief economist of the National Association of Manufactur-

But he said some of the strength in July, the biggest increase in nine in July was overstated, reflecting months, the government reported the increased demand for electric Monday, intensifying economists' ity and buildup in inventories, worries about rising inflationary pressures.

ity and buildup in inventories, "People ought not be frightened by these helty industrial produc-

> Prices on the New York stock market fell sharply on fears of higher interest rates. Page 8.

tion numbers, because the inventory buildup we have been seeing shows that there is still slack in the economy," he said.

Other analysts said the Fed would probably read the new figures as further evidence of an overheated economy that needs to be creases in interest rates. Last week, the central bank

boosted its discount rate half a percentage point to 6.5 percent. Raising the discount rate, the fee the Fed charges for lending to commercial banks, is the most dramatic signal the central bank can send of its intent to fight inflation by dampening demand through higher interest rates.
"The Fed is facing increasing ev-

idence of more strength than de-sired in the economy," said David Jones, an economist with Aubrey G. Lanston & Co. "This growth is

U.K. Retail Sales Data **Reignite Inflation Fears**

LONDON - The British government reported Monday that retail sales had reached a record high in July and industrial production had slowed in June, arousing fears of renewed inflation and a widening trade gap.

The release of the reports sent

the pound sharply lower, but it re-covered later in the day. Prices on the London Stock Exchange fell. The government said the index of retail sales in July rose by 2 percent from June to a record high, after a rise of 0.4 percent a month

Industrial output fell a provisional 0.85 percent in June, compared with a 0.94 percent rise in

Both figures exceeded financial markets' expectations. Economists said the boom inconsumer spending, fueled by tax

cuts and low borrowing rates, was drawing imports into Britain.

For the first half of the year, the deficit in the current account which measures trade in goods and services and certain fees - was

£5.6 billion (\$9.6 billion). Some analysts said that indicated a full-year deficit of more than £10 billion, compared with a £1.56 billion shortfall in 1987. The boom in spending is also

blamed for an increase in inflation, which is now expected to rise to 6

Japan's NEC Wants to Join U.S. Semiconductor Consortium

By David E. Sanger

New York Times Service TOKYO - In an unusual twist to an international technology rivalry, the world's largest commercial maker of computer chips, NEC Corp. of Japan, has expressed a strong interest in joining Sematech, a project spon-sored by the U.S. government in an effort to protect the American semiconductor industry.

From its inception last year, the U.S. consortium has excluded foreign-owned companies. Sematech is based on the premise that the semiconductor industry merits federal aid because it is vital to U.S. military and

But industry executives in Tokyo said NEC's interest means that the American chip industry and the Pentagon must face a difficult choice: They must weigh the benefits of supporting only U.S. companies against the costs of passing up technological skilled chip makers.

Complicating the issue, experts on both sides of the Pacific said, is that efforts to keep new chip technologies within national borders are increasingly doomed to failure. In recent months, as the industry has experienced one of its biggest booms, the crazy ers no matter what we do," said John P.

anese makers has grown even more intricate. Not surprisingly, the pace of unofficial technical communications between Tokyo and Silicon Valley in California has picked up tremendously.

NEC itself operates a big chip-fabrication plant near Sacramento, California, and there is talk that the plant will soon begin producing one-megabit memory chips — the indus-try's latest generation — based largely on methods learned at its facilities here.

Two months ago, one-megabit production began at a new joint-venture plant near Tokyo that is owned equally by Motorola Corp., a U.S. producer, and Toshiba Corp., one of Japan's largest semiconductor makers. The companies share proprietary technology.

And two founding members of Sematech Texas Instruments Inc. and International Business Machines Corp., are making onecontributions from one of Japan's most megabit chips in Japan at plants run by skilled chip makers.

megabit chips in Japan at plants run by Japanese engineers. While the two companies support Sematech's ban on foreign members, their executives admit that it is almost impossible to keep secret any innova-

tion in delicate chip-making technologies. "There is a flow of technology to foreign-

quilt of alliances between American and Jap- Stern, executive director of United States need to ensure that a healthy network of Electronics Industry Japan, a trade group. "People move between these companies all the time. And these days, the Japanese acquire an interest in American electronics its manufacturing capacity.

companies about once a week.' So far, NEC has made no formal appeal to industry and American taxpayers," said on Sematech. But it has made its interest Robert N. Noyce, a founder of Intel Corp. and a pioneer of the American semiconduction. join Sematech. But it has made its interest known in the industry, and its normally cautious executives discussed the matter at

length in a recent interview. The Sematech project is a U.S. project," said Tomihiro Matsumura, a director of NEC and head of its \$3 billion-a-year semiconductor division, "but it is tackling prob-lems that could be solved quickly with multinational cooperation."

"We are able to cooperate in the military arena," Mr. Matsumura said, a reference to the recent accord for American involvement in the design and development of a new Japanese jet fighter, based largely on General Dynamics Corp.'s F-16. "Why can't we do it in the semiconductor area?"

He added that he thought the company could find a way of making an "effective technology transfer" to the American project, and he suggested NEC's motive was closely aligned to that of U.S. makers: the the most up-to-date technologically.

equipment makers and suppliers remains in the United States, where NEC is building up

Sematech officials dismissed the offer. "Sematech is for the benefit of American

tor industry, who reluctantly agreed to head Sematech two weeks ago after a lengthy search for a director failed. Japan's own ascendancy in the semicon-

ductor market began with the very largescale integrated circuit program sponsored by its Ministry of International Trade and Industry in the mid-1970s. American companies were not invited to join. For the consortium, the central issue is

whether it has more to gain or lose by allowing a Japanese company to contribute. Mr. Matsumura declined to specify what

kind of technologies NEC was prepared to bring to Sematech. Already some of the giants of semiconductor production, particularly IBM and American Telephone & Telegraph Co., have turned over to the group designs and processes that observers called

Fujitsu to Start Mass Producing DRAMs in U.S.

Agence France-Presse TOKYO - Fujitsu Ltd. said Monday that it would start mass producing onemegabit dynamic random-access memory chips at its plant in San Diego in September.

A spokesman said the move was aimed to meet rising U.S. demand for the most advanced memory chip, used in mainframe computers and other equipment. Fujitsu also is considering

mass producing the chips in Ireland and Singapore by early next year.

Industry sources said that because of shortages for powerful DRAM chips, only 70 percent of current demand is met. Japanese producers plan to increase their capital investments, but the shortage is expected to carry over into next

Idea of U.S.-Japan Accord on Free Trade Gains As for an agreement with Japan, pendency, not how to reverse or tral to American economic policy into the next century." Adding momentum to the free-By Clyde H. Farnsworth New York Times Service

WASHINGTON — Mike Mans field has long felt that the United States and Japan, with the two largest and most dynamic economies in the world, have an obligation to

form an economic partnership.

For one thing, said the U.S. ambassador to Tokyo since 1977, something is needed to prevent recurrent fights over computer chips, beef, citrus, rice, baseball bats, skis and other items of trade from undescutting political ties.

The recent surge in investment and trade, he further contended, has so inextricably linked the their economies that the two governments must give a much higher pri-ority to managing the relationship. Mr. Mansfield's solution is a free-trade area in which the governments would agree, over a certain number of years, to sweep away tariffs and other trade barriers. They also would empower bina-

tional panels to make binding deci-

sions to resolve disputes. Washington likes the idea of free-trade agreements, but picked two other countries, Israel and Canada, as its initial partners. The pact with Israel went into effect in 1985. That with Canada was reached last year and still needs ratification, but is expected to go

the general view, when Mr. Mans-field first made the proposal in the Takeshita of Japan visited Washearly 1980s, was that it was ridiculous to talk about such an arrange-ment between countries of such dif-Mr. Byrd. trade idea was a bill introduced in the Senate this month by Max Bancus, a Montana Democrat, who calls for a comprehensive pact with Japan "as the centerpiece of a new trade policy that can reverse the economic decline of the U.S."

Under Sen. Baucus's variation of Mr. Mansfield's plan, the two gov-ernments would negotiate on targets to increase trade while reducing the huge imbalances against the United States, set up rules to ease trade problems, create a mechanism for increased economic and monetary coordination and seek a "more equitable" redistribution of

the world security burden. Observers cited these principal objections to a trade arrangement:

• The perception that the United States would never win enough access to the Japanese market to make trade in the immediate future.)

"As a practical matter, it seems

By Eric N. Berg New York Times Server NEW YORK — Chubb Corp., one of cepted for the coverage will receive a pay-

the largest insurers in the United States, thought it was doing itself and the nation's farmers a favor two years ago, when it tain level. The excluded farmers charged began offering rain insurance. Chubb that Chubb decided to return their money would make a tidy profit from a clever product, and the farmers would be protecting that the insurer might have to make a huge payout.

rain insurance, and it is refusing to issue policies to 6,200 farmers in 10 Farm Belt states who applied for the coverage this spring. Chubb said it is not obliged to provide the coverage because its between now and all between now and all between now and its between now and now and its between now and now vide the coverage because its brokers accepted applications for \$413 million in insurance after a \$30 million limit had been set and because it reserved the right to reject applications after they were submitted.

um checks and bas offered to pay those who met the application deadline amounts equal

ment averaging about \$40,000 if rainfall during the growing season is below a certain level. The excluded farmers charged

ed against a lack of rainfall.

If the farmers prevail, Chubb will have to Now, Chubb wishes it had never heard of issue millions of dollars in rain insurance. If enough rain does not fall between now and while a large payment would not cripple the
loth-largest U.S. property and casualty instrer — as of June 30, Chubb's net worth
was \$2.1 billion — it would weaken it.
A bigger problem is that Chubb's reputation is stake, and customer attitudes could
be affected for a long for the Forger the

The struggle has quickly turned nasty.

Chubb has returned the farmers' premime checks and has offered to pay those who

Be affected for a long time. For years, the company, founded in 1882 by Thomas and Percy Chubb, and based in Warren, New Jersey, has been regarded in the insurance to their premiums, which averaged \$2,300. industry as a model of fairness and decency Thousands of the farmers accepted the of-that almost always paid its claims promptly. Chubb's reputation has indeed been sul-

But more than 1,000 farmers, whose lied in recent weeks. Farmers have held crops have withered during one of the rallies, met with lawyers and won the symworst droughts this century, do not want pathy of state insurance commissioners. In

Indiana, Kentucky, Missouri, Ohio and Wisconsin said Chubb had to provide the coverage. Minnesota's commissioner has made a similar determination, and all 10 commissioners have said they would seek to have Chubb's licenses to sell all sorts of

U.S. Insurer Chubb Stirred Up a Storm With Its Farmers Rain Policies

insurance revoked if it does not relent. Throughout, almost all the facts in the case have been uncontested. On May 1, Chubb began marketing its rain policies through 236 sales representatives of Good Weather International Inc., a company based in Jericho, New York, that special-izes in weather insurance. Good Weather was acting strictly as a marketer of the policies. Insurance was to be provided by the Federal Insurance Co., a Chubb unit Chubb insisted that it explicitly told

Good Weather not to extend more than \$30 million in coverage. And, on June 1, after a month of sales, only 124 applica-tions, representing \$4 million in insurance, had been received at Good Weather's headquarters.

because of the sheer volume it took 12 days for applications to be collated and shipped to Good Weather's headquarters. Chubb insists that only then did it learn that 10 times its coverage limit had been sold.

G. Terry Vangilder, a senior underwriting officer, was put in charge of clearing up the mess. On July 1, he ordered premium checks returned. His next challenge was determining which farmers had qualified for coverage by applying before the \$30 million limit was reached: He had computer programmers design a system that read and "sequenced" all 8,700 applications. It took more than three days.

The outcome is anything but certain.
One possibility is that Chubb will be forced to issue the policies, although it still might not have to make payments on them if it rains heavily before Aug. 31. But if Chubb is not compelled to issue the policies, indus-try experts said, it is virtually certain that some of the disputes would have to be decided in court, which could take years.

For Chubb, what started as a small pro-Then, between June 13 and the deadline of midnight June 15, premium checks their risks — only 200 farmers signed up flooded in, partly because of news reports for \$5 million in rain insurance in 1987 — that a drought loomed. Chubb said that

A future-oriented corporate structure is

the challenge of the market place. But re-

organization of the financing and ownership

base requires a bank of truly uncommon

For corporate restructuring, we supply more than merely money.

In any undertaking of such complexity, "financial engineers" are a must. The BHF-BANK Group supports you in the planning and implementation phase through its merger and acquisition consultancy "Frankfurt Consult", as well as through its specialists in London, New York and Tokyo. In the sale or purchase of companies and holdings, in management buy-outs and in the acquisition of investment capital. The BHF-BANK Group, furthermore, acts as your entrepreneurial partner, supplying the knowhow and the capital instrumental to goal achievement.

Financial strategy expertise, however, is not all it takes to make a bank a partner for the discerning customer. Equally important are a service-minded approach and customized problem solutions - the style of a merchant bank, which BHF-BANK has cultivated for more than 100 years.

ope and Asia IRELAND: Austerity Program Boosts the Economy (Continued from Page 1) A Better Outlook in Ireland

The Economy Has

has a comparatively impoverished economy. Its wealth is less than two-thirds of the European average. It must upgrade its industrial structure to compete.

"If we're going to survive against the giants of Europe, we have to get our house in order and be a prolitable, cost-effective place for doing business," said John R. McMahon, chief economist of the Industrial 2
Development Authority of Ireland.

"There's no office choice for us."

"So far, it has paid off Government borrowing as a percentage of

gross national product has betifen a month of the second o from 13.2 percent in 1986 to a projected 8.2 percent this year. The economy, which had contracted by 1.6 percent in 1986, grew

by 4.5 percent last year, thanks to a 14 percent rise in exports. In 1987, the export surge gave Ireland a trade surplus in its cur-rent account, which includes both goods and services, for the first time in 20 years.

And, for the first four months of 1988, exports, led by electronics and chemicals, rose by 18 percent, although economic growth for the year is expected to slow to 2 percent or less, dampened by further reductions in public spending. Moreover, interest rates have

fallen sharply and inflation is down to an annual rate of 1.8 percent. Wage and price hikes are being kept in check by a deal the govern-ment, shortly after coming to power, struck with major trade unions: that pay raises be held to 3 percent a year for the next three years.

There are signs that consumer and business confidence is increasing: Housing prices in Dublin, after remaining stagnant or falling for six years, have begun to rise; car registrations rose 14 percent in the first quarter of 1988, and foreigners ave become net buyers of hundreds of millions of dollars' worth

of government bonds. And, in another vote of confidence in the government, foreign companies are opening scores of factories and research plants. Despite the encouraging trends, ireland still faces at least a few

more years of ansterity.

In a June speech to Parliament Mr. Haughey said "great progress had been made in overcoming economic difficulties. But, he warned, "we are still spending and borrowing too much in relation to what we produce and our capacity to pay."

Ireland's foreign debt alone represents 60 percent of its gross national product, while its total debt, about \$38 billion, comes to \$41,000 for each household in the country. The other persistent worry is unemployment. The jobless rate has leveled off and may even be declining marginally, but it remains at an exceptionally high 19 percent. And any easing of that number is largely

one-third of Ireland's college grad-

uates seek work overseas. Steady growth is the only longterm cure for Ireland's national debt, unemployment and emigration. To achieve that, the nation must foster far more entrepreneurs to generate profits and jobs.

Ireland has produced a handful of substantial multinational corporations in this decade, including the holding company conglomerate, Jefferson Smurfit Group Ltd.; the aviation-leasing company, Guinness Peat, and the agricultural developer, Masstock.

Several companies are in the upand-coming category. Most were founded by young Irishmen who worked overseas, saved money and returned home to start businesses. Pascal Phelan founded the Mas-

and the Irish beef industry. His company buys Irish cattle, slaughters and processes them at its six factories, and ships most of the vacuum-packed cuts to major Brit-ish food retailers, including Sains-

burys, Tesco and Marks & Spencer. When Master Meat Packers

ing more of the processing value and profits in Ireland. The company's sales, all from exports, are running at \$235 million, up 60 percent in two years.

Mentec International Ltd. represents an effort to exploit the large presence of foreign multinationals in Ireland. Founded in 1978 by Michael Peirce, a former lecturer in electrical engineering at the Uni-versity of Dublin's Trinity College, it makes specialized computer systems for manufacturing. With electrical engineers and

computer scientists accounting for nearly two-thirds of its work force of 100 people, Mentec is the kind of company the Irish government would like to see more of. Like all Irish entrepreneurs, Mr.

Peirce praises the present business environment, with one elaring exter Meat Packers Group, applying ception: the extremely high person-experience in Australian banking al income tax rates. The top rate, of 58 percent, starts at \$15,000 for a single person and at \$29,200 for a married household head Government officials recognize

the toll that high personal taxes have on entrepreneurial drive. And, what vague, to cut income taxes.

opened for business, most Irish beef was still shipped by the car-da," said Mr. Brennan, the trade cass. The company has played a large role in shifting the local industry to boneless cuts, thus keep-

BRITAIN: Rise in Sales Reignites Fears of Inflation provement in the worsening U.K. **London Dollar Rates** trade position."

The dollar was stable as business slackened before the release of U.S. trade data, due on Tuesday. It closed in New York at 1.8800 DM, a slight easing from 1.8825 at Friday's close; at 133.30 yen, from 133.25; at 1.5785 Swiss francs,

compared with 1.5765; and at 6.3805 French francs, down from business profits, worried the stock could also increase costs to producters and impede industrial expan-In London, it closed at 1.8822 DM, slightly higher than 1.8790 DM at Friday's close, and at 133.25 yen, barely changed from 133.23. The dollar finished at 1.5793 Swiss

francs, against 1.5753, and at 6.3855 French francs, compared with 6.3825. "Hardly anything happened to the dollar today before the trade figures," a currency dealer for a U.S. bank said.

Economists are expecting the U.S. merchandise trade deficit for June to widen slightly, with esti-mates averaging around \$11.2 bil-lion, from May's \$10.9 billion defi-

Bundesbank Forecasts Recovery in Banks' Profit

FRANKFURT — Last October's market collapse made the annual earnings growth of West Germany's banks slow in 1987 for the first time this decade, but the setback should be only temporary, the Bundesbank said Monday.

"Noninterest business was above all affected," the central bank said in its August monthly search with a second in the August monthly search.

said in its August monthly report. "This was temporarily subjected to tremendous pressure due to the share collapse last autumn."

Operating profit dropped 10.1 percent to 26.5 billion Deutsche marks (\$14.1 billion). Pretax profit fell 8.8 percent to 19.4 billion DM. But the Bundesbank said the figures "do not indicate a lasting fell in profitability because the percent to the deep deposit parties." fall in profitability, because the reasons for the drop do not persist on international capital markets."

It added that reports of several banks for the first half of 1988

pointed to a recovery, and it cited the banks' solid capital ba The commission surplus fell 2.5 percent to 11.8 billion DM in 1987. The decline resulted from reduced primary and secondary securities business in the last 1987 quarter. The report cited writeoffs in that business and drops in earnings from own-account

The interest surplus totaled 70.5 billion DM in 1987, unchanged from the previous year. But with business volume rising 6.9 percent to 3.7 trillion DM, the share of interest surplus in business volume

fell to 1.89 percent from 2.02 percent.

The Bundesbank cited a sharp rise in less profitable long-term loans and a fall in short- and medium-term loans.

lost out on the chance to make big profits when the dollar rose to 135 lower dollar, option traders said. As long as the dollar was un-changed or falling, exporters could sell portions of their incoming dolyen because they were forced to sell

TOKYO - Japanese exporters at much lower levels to cover currency option commitments, ac-cording to currency analysts. What are called foreign ex-

change opportunity losses occurred in June, when the dollar rose above 127 yen on news of an unexpected-ly small April U.S. trade deficit.

The rise triggered the exercising of dollar call options sold by ex-porters as part of a strategy called "zero-cost." The option holders required them to sell dollars below market prices.

"Japanese corporations lost the chance to sell dollars at higher levels, but real losses were probably few," said Tetsufumi Fujisawa, head option trader at Sumitomo

In a typical zero-cost option transaction to hedge against a falling dollar, an exporter buys a \$10 million put option. This gives the exporter the right to sell dollars at a specified price, no matter how low

the currency falls. But the exporter must also sell a Many exporters rushed to buy \$30 million call option under this dollars in the spot market to cover strategy. This option gives the other party, usually a bank, the right to buy dollars from the exporter, also at a predetermined price. This three-to-one ratio enables the party

giving rise to the name "zero-cost." Japanese exporting companies,

lars for yen at favorable prices.

Many Japanese exporters sold dollars aggressively after the re-lease of good U.S. trade deficit numbers to keep the dollar from rising over the call option strike

sell dollars cheaply, traders said. This strategy was quite successful until June, but in June a lot of the corporates got caught," said Arie Assayag, a currency options trader at Société Générale's Tokyo

price, at which they would have to

In June, dollar bullishness after a smaller-than-expected \$10.3 billion April U.S. trade deficit overpowered sales of the currency by Japa-

The dollar, which traded around 125 yen on June 14, rose to close on June 22 above 127.50 yen for the first time in Tokyo in three months. It continued to soar and ended at the year's high for Tokyo of 135.15

yen on July 18. option commitments.

This sudden rush for dollars helped add momentum to the currency's upward surge, traders said.
"When the dollar went up, a lot

that sells the riskier put option to of people said. 'Hell, I want to dispense with the premium that the change my mind,' but they buyer would normally pay, thus couldn't," said an options specialist at a U.S. investment banking firm in Tokyo.

using zero-cost options heavily they had made on earlier transac-since February to hedge against a tions" in options, the specialist in options, the specialist

Ironically, zero-cost options were originally designed by banks in part to induce Japanese corpora-tions, which dislike paying premi-

ums, to use options, traders said. Many Japanese exporters calculate their break-even levels on a 125 yen dollar, so few companies actually lost money, traders said. With the dollar trading above 130 yen, exporters have been able to profit

by selling dollars forward. In addition, many companies had matched their call option commitments with dollar proceeds from overseas sales. Many export-ers who were not matched evenly went to the currency swap market to borrow dollars owed on option

commitments. Other exporters hedged by buying dollars or straight-out call options to cover their positions, trad-

"It's true that there were opportunity losses, but actual profits were much bigger," said Masao Kotani, vice president at Citibank's

Still options traders said that zero-cost option trading, which un-til June accounted for 60 percent of the \$6 billion to \$10 billion monthly volume in the Tokyo over-thecounter corporate cash currency option market, declined sharply in July and August.

Japanese importers, seeing the ssibility that the dollar may rise especially car makers and electronics companies, which receive dollars from overseas sales, had been ended up eroding some of the gains rency's upside movement. further, are starting to use zero-cost options to hedge against the cur-

Mexico Extends Freezes

New York Times Service

MEXICO CITY — The government, in its first major statement on domestic economic policy since last month's tumultuous presidential election, said its freezes on prices, wages and the exchange rate would be extended until Nov. 30.

To soften the blow for workers, however, the government said late Sunday it would remove a 6 percent value-added tax from all basic foodstuffs and medicines during the next three months. It also announced a tax cut of 30 percent for wage earners paid \$15 a day or less, which would benefit the vast majority of Mexican workers. Business groups estimated that the new measures would cost the government about \$130 million in lost revenues.

The freezes, in existence nine months, have cut inflation from a monthly high of 15.5 percent in January to about 1 percent this month.

ROUND ABOUT CLOSE TO MID-NIGHT: The Jazz Writings of Boris

Translated and Edited by Mike Zwerin. Quartet Books Ltd., 27 Goodge Street, London W1.

Reviewed by Stuart Troup

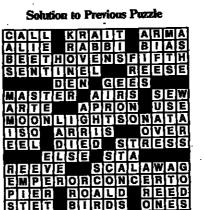

T HE jazz traditionalists and the becoppers in postwar France were bartling the worthiness of the musical changes coming across the Atlantic. And Boris Vian frolicked among them, baiting and castigating the combatants with wit, whimsy and satire. His attraction to the bebop evolution neither

precluded his love for Louis Armstrong and Sidney Bechet nor blinded him to the narrow views held by some new-schoolers. Between making reports on the state of the art, he chronicled the petry infighting between branches of the Hot Club de France, scolded record producers for delivering half-loaves and

poked fun at himself and his profession.

Almost 30 years after Vian's death at age 39.

Mike Zwerin has resuscitated his spirit, his perception and, to be fair, even some of his Crow Jim views in a collection of essays by the Frenchman he calls "the best jazz writer of all time." In deftly funneling Vian's prose into English, Zwerin — himself a savvy chronicler of jazz, for the International Herald Tribune has retained the author's Franglais argot.
War had screened Europe from the gradual

Stateside emergence of bebop during the 1940s, when such players as Charlie Parker and Dizzy Gillespie had synthesized new harmonic tonal and rhythmic standards. The sound hit the French jazz community like a joht after the Liberation. It was anotherna to many, and

His favorite target was the jazz historian Vian took them apart. Hugues Panassie, a major force in the Hof Club de France, who concluded that bebop was essentially the art of diminished lifths. in reply to such ridiculism. Vian suggested in the March 1950 issue of Jazz News several ways to

achieve Panassie's theory. Among them: "Issue confidential buy-orders for a large block of fifths and then dump them all on the market without warning. The lifth will diminish automatically by the law of supply and

Amid a potpourri of whimsy in the Novem ber 1949 issue of Jazz News, he noted: "With regard to the pocket trumpet, the Americans have put a new elliptical monthpiece on the market. According to publicity, it will added three notes to the upper register. What should we do with them?

we do with them!

Vian rarely let his views get in the way of his fun, except on the issue of racism. His reviews of music were succinct and imaginative. And when descriptors failed him, as with Gillespie's recording of "Oop Pop a Da," he wrote:
"Buy this record even if you can't pay your taxes and have to talk your girlfriend out of

going to the movies."

Perhaps Vian best characterized his own work in the February 1953 issue of La Parisienne, when he wrote: "There are those who are in no hurry to crown or classify - those who mock accepted values, who rejoice when the unexpected wipes out their theories, who write articles on jazz because it's fun, who are interested in it because it's music. When these people put records on their turntables and play them, they grightly understand that a record them, they quickly understand that a good number of jazz records hold their own against Albinoni, Berg and Ravel. And it amuses them to read other people's articles about their favorite sport because they are pleased when it is spoken about at all, even by idiots (idiots can be fun). These good people, I fondly hope, are my readers. I love people who know how to laugh, even if they laugh at me."

Stuart Troup, who is on the staff of Newsday, wrote this for the International Herald Tribune.

PGA Champ Sluman Becomes Golf's Little Big Man

By Sally Jenkins

Washington Past Service
EDMOND, Oklahoma — There were too many other players to consider going into Sunday's final round of the PGA Championship at Oak Tree to pay much mind to diminutive Jeff Sluman. But the shortest, shyest player here shot a record-tying round 6-under-par 65 to win the last major tournament of the golf season - which also happened to be the first victory of a mostly undistinguished career.

Shuman could easily have won by attrition. since his closest competition, third-round leader Paul Azinger and Britain's Nick Faldo, could only muster rounds of 71. Instead, the 30-year-old, who began the day three strokes back, fled from the field with five birdies, a single bogey and an eagle on the par-5 fifth hole that turned out to be

That delivered victory by three strokes a tie for fourth with Tom Kite (67) and left over Azinger, a former teammate at Florida Tommy Nakajima (67) alone in third at 278. State, and the largest paycheck of his career, \$160,000. Two tournament scoring records were also matched from this unsuspected source: the lowest final round of a PGA and the lowest winning total (12-under-par 272), both set by David Graham at Oakland Hills

"I thought I had a good chance starting the day, really," Shuman said. "I just wanted to get it under par early and see what hap-pened from there."

Shunan, who stands 5-foot-7 (1.70 meters), hung around largely unnoticed all week with scores of 69-70-68, neither saying nor doing much other than staying in contention.

ing records on the usually severe Pete Dye-designed course, which was weakened by a close." Azinger said. "I never was really was my nemesis for the week," he said. "If I had to say what hole cost me, it was that lack of wind and soft greens. Bob Gilder set a course record of 66 on the first day; club pro Jay Overton tied that, and Dave Rummells tablished a new one with a 64 on Friday. Saturday, Azinger made a hole-in-one to take a one-stroke lead over Rummells going

After such craziness, the final round promised much. So did the final major of the season, after three glamorous winners in Sandy Lyle at the Masters, Curtis Strange at the U.S. Open and Seve Ballesieros at the British Open. Faldo, who began the day four strokes back and finished second in the U.S. Open and third at the British Open, would have been a more likely winner.

Azinger's 9-under 275 gave him yet another runner-up check, worth \$100,000, while Faldo's bogey on the 18th for 279 put him in

Forgotten in all this was a curious fact of the 1988 PGA tour: The last seven straight tournaments had been won by first-timers, starting with qualifier Jim Benepe, at the Western Open, through Jodie Mudd at the St. Jude Classic. Still, anyone could be forgiven for never expecting anything like Shiman's 65, which has to be considered among the most worthy winning rounds of a major championship. But the PGA had never been won by a first-timer in the modern era (and the last player to win a major as his first victory was Jerry Pate, in the 1976 U.S.

"I think Jeff Sluman played probably one

The tournament was all but decided on the front nine. Azinger began the day with a birdie on the first hole with a 12-foot putt to move to 10-under, but that was the last time he would feel anything close to being in command because Sluman, playing a hole ahead, simultaneously birdied the second with a wedge to within a foot.

left by water and on the right by scrub trees. Here, Shuman smacked a driver and a 4-iron to within 115 yards of the tiny, islandlike green. He pulled out his pitching wedge, but put it back in favor of a sand wedge; he then lofted a gentle shot that bounced twice and rolled in for eagle to put him 9 under.

"That's the first time I've ever gotten chills in 95-degree heat [35 degrees centigrade]," iron on par-3 No. 17 hit the flagstick; for a said Shuman. "I won't tell you I knew it was going in when I hit it, but I knew it was going seemed possible, but the ball spun 18 feet to be close.

rough and the ball came to rest just below a lone tree that obstructed his line back to the thought he had something won, in a playoff fairway. He cut an iron around the tree to a to Lyle in last year's Tournament Players bank by the water on the opposite side of the Championship. Since then he hadn't done fairway, then left a 7-iron short of the green. much of note except play consistently, with His chip checked up four feet away; when he two top-five and three top-10 finishes this missed the putt he fell into a tie with Sluman. season

The fifth hole cost Azinger the tournament. He played it in an aggregate 4-over he'd just won his first tournament - and a par, including a double bogey on Saturday, major, to boot. "I wasn't thinking of what it when he had not quite recovered from a meant to me," said Shuman. "I was just

Azinger also bogeyed the par-4 sixth (a three-putt from 40 feet) to give up his share of the lead for good. From there, Sluman went on to three more birdies before his only bogey came on the 149-yard 13th, when he sliced a 9-iron short and into rough. But he collected himself immediately, saving par with a gritty 15-foot putt on the par-4 Azinger's three-stroke margin evaporated with a gritty 15-foot putt on the par-4 on the fifth hole, a sweeping 590-yard (539- No. 14, and then made his final birdie on the meter) monster completely bordered on the No. 14, and then made his final birdie on the within eight feet of the flag.

That gave him a four-stroke lead over Azinger with three to play. "I thought if he could play the last three in four under, then God bless him," Sluman said.

For a moment, it seemed Azinger might when he made a birdie on par-5 No. 16 by reaching it in two, and then watched his 6away. Azinger made the putt for a birdie, but Minutes later, Azinger bogeyed the hole by that time Sluman was safely walking up for a three-stroke swing. He drove into the 18th for a par.

Shuman had lost once before when he

leaders, high school marching

capacity).

The gymnasts were part of a 12member team of juniors who traveled throughout South Africa in The IOC has no rule that forbids athletes who have played in South

Africa from competing in the Olympics. In general, the IOC has left eligibility requirements to each sport's international federation. The strongest action the IOC has taken was to "urge" the federation to sever ties to South Africa. Most

did, once the IOC expelled the South African national Olympic committee.

Among the 15 that haven't are federations for 12 sports on the Seoul program: archery, badminton (exhibition), canoeing, equestrian, fencing, gymnastics, field hockey, modern pentathlon, rowing shooting tennis and yachting.
The other sports are hockey,

skating and skiing.

Any action taken by the IOC would only apply for the Olympics. Whether other events could be staged in South Africa, or whether South African athletes could compete outside their country, would still be determined by the individual federations.

bands, package tours of hometown fans and the league's formidable **Diver Is Charged** public relations operation. All this With Manslaughter

League officials explained that, regrettably, there was a limit to the endurance of even that most dog-ged species of consumer, the U.S. fan. Further growth in the home market appears limited, so the vast population of football-benighted

foreigners beckons, mainly as buy-ers of television rights and NFL NFL games are shown weekly to Britain, and an estimated 10,000 games are occasionally shown, and leagues in West Germany, Italy, well

ESCORT

SERVICE

There are plans for further over-

seas exhibition games to promote the sport. Talks are under way to stage exhibition games next year in Japan and one in West Germany. Some of the real football missionaries are thinking further ahead. "We're interested in going to the Soviet Union," said Mike Lynn, general manager of the Vi-We want to be the first NFL team to play in a communist

The NFL effort to take the dis-

tinctively American sport of football abroad began in earnest only a few years ago, and it met with much skepticism at the time. The Chicago-Dallas game in Wembley Stadium in London two years ago was the league's first serious effort to stage a game overseas. Three previous NFL exhibition games in London, Mexico City and Tokyo, dating as far oack as 1976 and all handled by outside promoters — were failures.

But things have been markedly different for the three annual "American Bowl" games in London since 1986, with the most recent played last month between few million television viewers in Miami and San Francisco and Sunday's game here. Each time, the young Britons play the game. In NFL was far more actively in-other European countries, U.S. pro volved, bringing its resources to volved, bringing its resources to staging the game and bringing it's been constant for two weeks. A Way With Women

WASHINGTON — George interpret it that way," another aide said. "That's why we have our work ning the presidency is closing the cut out for us." gender gap. All the surveys indicate that women do not trust Bush, and if this is true, it could cost him the

What to do? A meeting was held in the New Orleans hotel suite of the vice president with his advisers in attendance.

"I can't understand it." Bush said. "I've always been wonderful to women. I let them precede me through a revolving door, I Dever order

from the menu Buchwaid before they do, and I always lit their cigarettes for them before the surgeon general declared it illegal.

One of the VP's aides said, "That's all good gender stuff, sir, but we believe that the reason women are mad at you is because of some of the things you said dur-ing your debate with Geraldine Ferraro. Do you remember that after it was over you told the press how you kicked a little ass?

"That was just a joke," Bush said. "I wasn't talking about Mrs. Ferraro. I was referring to the Sandinistas in Nicaragua.

The American women didn't

Franciscans Pray For Return of Relics

New York Times Service

KENNEBUNKPORT, Maine. -The Franciscan Monastery here is relying once again on St. Anthony, the saint of lost articles. The 10 priests and 10 seminarians at the Roman Catholic monastery are praying for the safe return of a glass and bronze case containing some of St. Anthony's remains, which were stolen from the base of a statue of the saint in the monastery chapel July 30.

The friars said that if the case is found, it will be yet another in a long list of missing items the monastery has recovered after prayers to the saint. The case was stolen 10 years ago and recovered by police. A tapestry of St. Anthony was stolen off the chapel wall and returned anonymously through the mail.

"Well, what do you want me to do?" Bush demanded.

Bush's political pollster said. "Our surveys show that women think of you as someone they can push around. They don't believe you could arm wrestle the Ayatollah Khomeini and win."

"I resent that. Aren't they familiar with my war record?"

"They know about it but it's all canceled out when you use words like doodoo in your speeches. We

have to remake your image." "Could you elaborate on that?" the vice president asked.

"Do you have any objection to wearing a green beret when you get

"No, I don't." "One of the things our polls tell us is that women dislike you trying to look like something you are not. For example, they say that every time they see you driving a wheat thresher in Kansas, they want to upchuck. I think you're going to have to knock off everything, in-cluding mining coal in West Virginia, for the evening news."

"Does that mean I can't pretend I'm fishing for tuna off Key West?"

"You're not fooling anyone, sir. The only way for you to close the gender gap is to be yourself."

"It won't be easy. But if someone said to you, Who are you? what

would be your reply?" "I'd say, I am the vice president of the United States, but I didn't know anything about Noriega in

"That's very good, sir. Even if they don't believe you, it sounds honest. Now, women don't expect their presidents to be terrific lovers. but it doesn't hurt if they think you

Bayreuth: Still The Standard

By John Rockwell
New York Times Service

BAYREUTH, West Germany

—A visitor to this summer's Bayreuth Festival, the Wagnerian shrine inaugurated in 1876 by the composer himself, would be hard pressed to detect signs of endemic ill health.

As always, the festival is hopelessly, even indicrously sold out. with thousands on the waiting lists and hundreds of supplicants - most of whom travel a considerable distance just to get here turned away each afternoon. The

festival will end Aug. 29. Certainly, not every production or every individual contribution is ideal, and boos commingled with cheers in the emotional aftermath of every performance.

But there is a striking, if controversial, new "Ring des Nibelungen" from the East German director Harry Kupfer, as well as revivals of stagings of "Lohen-grin" (by the film director Werner Herzog), "Die Meistersinger von Nürnberg" (by the composer's grandson and festival direc-tor Wolfgang Wagner) and "Par-sifal" (by Götz Friedrich).

Every opera, even if the staging seemed misguided, is so obviously prepared with painstaking care, and the general atmosphere of quality and conscientiousness is so palpable, that the festival still stands as the archetype against which all others must be

How do Bayreuth performances stack up against those of days distant and not so distant? Is the festival presenting the best possible casts and productions, given the opportunities and realities of today's operatic world? And what are the prospects for its

Its past is illustrious, but also tarnished. Illustrious, because Wagner oversaw the first two festivals — in 1876, when the 'Ring" was first performed complete, and 1882, with the first performances of "Parsifal." years following his death in 1883. when the festival was run by his widow, Cosima, and then by his

son. Siegfried, saw the apogee of

Wagnerism worldwide. The great Wagner singers and conductors of the time came to Bayreuth, and so did the intelligentsia of Europe and the world. But by early in this century, Bayreuth had become something of a think tank for racist, protofascist pontifications. and by the 1920s, its productions had all too obviously slipped into misguided preservation of an outdated past.

Wagner had expressed severe reservations about the success of the designs and acting (and singing and conducting for that mat-ter) in the first "Ring," yet Cosima and Siegfried stuck largely to re-creations of what they perceived to be his intentions. Innovations elsewhere — the designs of Gordon Craig and Adolphe Appia, for instance — were unwelcome at Bayreuth.

Cosima and Siegfried both died in 1930, and the Englishborn, Nazi-loving Winifred, Siegfried's widow, assumed the festival directorship. Her most notorious contribution was the staining of the Wagner name (not that Wagner himself didn't have his unpleasant personal and ideological aspects, anti-Semitism very much included) by transforming the festival into an overt Naza center.

When the festival reopened in 1951, it was under the directorship of the composer's grandsons, Wieland and Wolfgang. Both di-rected and designed, but it was Wieland who deservedly seized the world's attention. Although he had apprenticed under Tietjen and such 1930s German design ers as Emil Prectorius, it was Wie-land who revolutionized Wagner staging and brought Bayreuth into the modern world. He did this first through the quality of productions, which blended striking, classically minimal designs with brilliant directorial touches and his consummate skill for eliciting the best possible dra-matic performances from the

singers he had selected.
Wieland brought Appia's ideas, especially of the Wagner stage as a mystical play of light, to fulfillment. He also worked to cultivate a new Wagner ensemble

Scene from "Das Rheingold," part of the new Ring production.

at Bayreuth, stocked with singers both famous and at least initially less well-known, and conducted men not immediately known Wagnerians but with strong links to modern music and thought, Pierre Boulez being the prototype.

Wieland internationalized Bayreuth, bringing in Americans and Jews and blacks and others to such an extent that the Bayreuth old guard (which now looks back on the 1950s as a golden era, and rightly so) was outraged.

It was therefore a tragedy that far transcended the individual when Wieland died of cancer in 1966, at the age of 49. Suddenly, Bayreuth was left in the hands of Wolfgang, two years younger and far less talented.

spent considerable time at Bayreuth in the 1960s, including the summer of 1965, Wieland's final active season there (he staged a new "Ring," and at the time, there were no inklings of illness). Subsequent visits have been occasional and brief, and it was with trepidation, as well as nostalgia, that I returned this summer, for my first complete round of performances in some 20 years.

There were reasons for trepidation. Not all of Wolfgang's casting, either on paper or as heard on radio and records, seemed suc-

cessful. The productions of directors he had invited to Bayreuth had been a mixed bag, containing bad-boy radicalism and business-as-usual contemporary operatic avant-gardism in about equal measure, and his own stagings had seemed as dowdy as

Wagner-singing is not what it once was, either, everyone seemed to agree (although that's what people always think). And tales of Wolfgang's feuds with other Wagner family members hardly insured a happy future for the festival.

After nine days here, my feelings are rather more optimistic. As a stage director, Wolfgang has insisted on retaining some presence at Bayreuth. But he seems to know his limits better than he once did. His sets, to judge from the 1981 "Meistersinger" on dis-play this summer, look more surely conceived and executed and his direction is at least know-

And while many of the produc-tions of directors he has brought to the festival have been controversial (Patrice Chéreau's "Ring" in 1976 and Kupfer's this year) or outright failures (Sir Peter Hall's 1983 "Ring"), they have usually had the virtues of daring and energy. Wolfgang has refused to let Bayreuth revert to a musty temple of Wagnerian antiquities.
